

# RAM Electronics Announces New Apple-Compatible Cables

---

/EINPresswire.com/ Electronic cable and wire manufacturer introduces new line of high-quality, professional grade docking cables for iPads, iPods and iPhones.

CINNAMINSON, NJ – [RAM Electronics](#), a manufacturer and distributor of home theater, audio and video cabling and connecting equipment, has created a new series of high performance cables. The iPRO2 Series is a high performance docking cable for Apple devices, each with different input and output connection options. The cables are made in the U.S. and will soon be available through the RAM Electronics website.

"For line-level signals that are accessible from a docking connection instead of standard headphone jack options, these docking cables create that connection without the interference and drop-off in quality level," said Steve Misbin, president of RAM Electronics. "This creates a superior, crisp sound that audiophiles prefer."

The USB-compatible connection option allows continuous charging while playing when used with a standard 12VDC or 120VAC 1-amp to USB accessories adapter. Users looking for the highest quality sound can use these audio cables to connect their iPad, iPhone and iPod to their guitar amplifiers, radio and TV equipment, studio or PA mixing boards, car stereos, mobile device recorders, boating units and other audio equipment.

Different iPRO2 series cable connectors are compatible with various input and output plugs. Choices include 30-pin dock connector with Lightening compatibility, 3.5mm Mini Phone Plug, dual RCA, dual 1/4-inch mono phone plugs and dual XLR plugs.

The iPRO2 Series high performance professional cables also offer better strain relief for improved durability at both ends of the connection.

About RAM Electronics: RAM Electronics (<http://www.ramelectronics.net/>) is based in Cinnaminson, New Jersey. Founded in 1977, the company provides electronic assembly services from design to production for automotive, industrial and commercial industries. RAM Electronics manufactures [custom audio cables](#), wire harnesses and [TV coax cable](#) for electronic equipment.
