

# LifeLineMobile.com Offers Mobile Dental Solutions

/EINPresswire.com/ Since dental disease is one of the most common chronic illnesses affecting Americans, mobile dental solutions by LifeLineMobile.com are constructed to help put an end to this epidemic.

In a recent study conducted in Sacramento, California, officials determined that nearly 45% of children aged 6 and less had never visited a dentist. Some factors that contributed to the lack of dental care were limited access to dental offices, high costs of treatment, and lack of transportation.

In addition, this study determined that 90 percent of dental decay in children is preventable through daily flossing and brushing. In addition to offering essential dental care, mobile dental by LifeLine Mobile.com also teach children about the importance of oral health. Children are able to learn about the serious issues that can stem from dental neglect. Left untreated, bacteria from a rotting tooth can cause serious infections in other parts of the body, leading to an emergency medical situation.

To ensure that children in many areas receive dental care, mobile dental solutions by LifelineMobile.com are visiting children at school. These units are typically customized to make them appealing to children, with cartoons or customized artwork decorating both the interior and exterior of the unit. Inside, these units are equipped with all of the trappings of a traditional dental office. Available slide-out walls make the unit feel roomier and increase the available space needed to accommodate additional patients.

Within many mobile dental units, children are able to receive the following services:

- Oral Exams
- Cleanings
- Fillings

- Extractions
- X-rays
- Sealants
- Fluoride Treatment

[Mobile dental by LifeLineMobile.com](http://www.lifelinemobile.com) provides dental education and prevention services for children that may not otherwise receive dental care. These unique mobile care units offer quality dental treatments that make it easier for children to enjoy a lifetime of oral health.

#### About Lifeline Mobile:

LifeLine Mobile, established in 1987, is a premier manufacturer of mobile medical health care units. Unlike other companies, LifeLine Mobile provides the look and feel of a real office, providing maximum confidentiality and ease of access for patients. As a manufacturer, LifeLine is committed to continuous product improvement, significant annual investments in new products, on-going research, and continuous development.
