

# Vigilant Software updates ISO27001 Compliance Database and Update Service

/EINPresswire.com/ [Vigilant Software](#), the risk management solutions provider, has today launched an updated version of the [ISO27001 Compliance Database](#) and Update Service. The update reflects the increased number of compliance regulations, which has grown from 71 to 80. The regulatory bodies have also been updated.

The ISO27001 Compliance Database and Update Service is the only available product on the market that allows organisations to cost-effectively keep track of the number of relevant UK laws and regulations that are applicable to them.

As ISO27001 requires organisations to develop their information security management system (ISMS) taking into account business and legal or regulatory requirements, and contractual security obligations, it is vital to keep up-to-date of current legislation. The ISO27001 Compliance Database and Update Service will make this typically labour-intensive task much simpler.

Alan Calder, cyber security expert and CEO of Vigilant Software, says, "Keeping track of the ever-growing and changing UK laws and regulations that apply to your business can be a time-consuming minefield. The ISO27001 Compliance Database and Update Service will cost-effectively allow your organisation to identify which laws and regulations are applicable, ensuring compliance."

The ISO27001 Compliance Database and Update Service is available on an annual licence subscription at just £395 per year.

Vigilant Software will be offering demos of the ISO27001 Compliance Database and Update Service and the cyber security risk assessment tool [vsRisk™](#) at the Infosecurity Europe show, 23-25 April, Earls Court, London. In order to register your interest in a demo, please visit [www.vigilantsoftware.co.uk/Infosecurity-Europe-2013.aspx](http://www.vigilantsoftware.co.uk/Infosecurity-Europe-2013.aspx).

More information on Vigilant Software including the Compliance Database and the cyber security risk assessment tool vsRisk can be found at [www.vigilantsoftware.co.uk](http://www.vigilantsoftware.co.uk).
