

## DRIFIRE® Now Available to Veolia Environmental Services Employees

/EINPresswire.com/ Veolia Environmental Services selected DRIFIRE DualCool™ coverall for employee usage for ultimate comfort that reduces the possibility of heat stress and heat related injuries.

DRIFIRE®, the premier provider of comfortable flame resistant fabrics and protective apparel, is now available to Veolia Environmental Services (Veolia ES) employees, one of the world's leading environmental services companies. Veolia ES selected the DRIFIRE DualCool™ coverall for employee usage, demonstrating the continued importance of comfort and safety in personal protective wear.

The DualCool coverall is approved for use by employees in the Veolia ES Industrial Services division. With 2112 UL Certification, the coverall offers excellent flame resistant protection along with DRIFIRE's patented performance properties. The fabric's durable wicking and fast drying capabilities ensure ultimate comfort, while reducing the possibility of heat stress and heat related injuries.

Gathering user feedback is critically important to DRIFIRE, as evidenced by the extensive DualCool coverall wear trial implemented at various Veolia ES units. With positive end-user feedback generated from the trial, the coverall is an optimal choice for Veolia ES employees.

"DRIFIRE is thrilled with the positive responses from Veolia employees and management about our latest coverall. The wear trial generated excellent feedback. With the garment's incredible moisture management and fast drying properties, it keeps wearers cool in the heat and humidity," said Alan Wallis, senior vice president of industrial sales at DRIFIRE.

DRIFIRE and Veolia Environmental Services are mutually dedicated to employee safety. For more information about the inherent flame resistant products DRIFIRE offers, visit [www.DRIFIRE.com](http://www.DRIFIRE.com).

About DRIFIRE

DRIFIRE® is the premier provider and developer of flame resistant (FR) fabrics and protective apparel to the government, industrial and consumer markets. It is the first [FR wear](#) company to utilize drirelease®—the patented, optimal wicking and drying fabric technology used by the world’s premier athletic brands. This technology gives DRIFIRE garments high-performance properties to ensure wearers are cool, dry and comfortable to operate at their peak.
