

Lucid Logistics, (LL), Places Order for 20,000 GPS All-Satellite Modems

/EINPresswire.com/ To Begin Immediate Deployment of MRM/M2M Vehicle and [Asset Tracking Solutions](#)

San Luis Obispo, CA — Lucid Logistics, www.LucidLogistics.com, has placed an order for 20,000 GPS All-Satellite Modems from Quake Global™, the leading manufacturer of modems for Mobile Resource Management.

LL has purchased the most recent release of the Quake™ modem to embed the fastest and most cutting edge technology available in today's MRM market. This sizeable order from Quake™ is meant to fulfill the current backlog and pipeline of Lucid orders for the LL AMS-500i. Customer and reseller shipments will begin within the next 2 to 3 weeks.

"Having an all-satellite solution collecting, parsing, and securely delivering mission critical and/or time sensitive data, all within a few seconds, is an obvious game changer. The sheer speed of this next generation (AIC) technology is a milestone the entire industry is striving to reach; hence the reason for the size of the order," stated Cliff Henley, CEO of Lucid Logistics. "Kudos to the LL engineering and development teams for proving it can be done with absolute consistency around the clock."

The LL AMS-500i integrates with the LL Asset Information Center, (AIC), the browser based portal optimized for both PC and Mobile computing platforms. The AIC is architected to provide speed and accurate business intelligence far beyond anything available in the market today.

"The cutting edge technology created by Lucid Logistics is incredible", said Polina Braunstein, CEO of Quake Global. "We are delighted to have LL utilize the QPRO for these applications, and look forward to the advances this powerful innovation will create for MRM on a global scale."

Comprised of a seasoned team of industry professionals, LL provides cutting edge solutions with global on-ground support for use in vertical markets worldwide, including: Oil & Gas, Mining & Heavy Equipment, SCADA & Fixed Assets, Logistics, Government, & NGOs. This rugged 100% all-satellite asset tracking solution delivers the fastest near real-time business intelligence via the only meshed satellite network in the world, without fail.

About Lucid Logistics

LL offers a wide range of products, services, and complete solutions for worldwide fleet and asset management. Products are built to last, work extremely well, and are designed to produce and deliver secure and accurate data via a very easy to use, robust interface. LL provides cutting edge technology by continually designing, building, and delivering systems and services based on the complex needs, mandates, and requirements of global markets.

About Quake Global™

QUAKE™ designs and manufactures industrial M2M modems for asset tracking and monitoring through satellite, cellular, GPS and other technologies. Through a network of international distributors, QUAKE products serve OEMs and other companies in the heavy equipment, aviation, maritime, trucking, utility, oil and gas, and rail applications. QUAKE is proud to provide high-quality subscriber communicators for KOMATSU, CATERPILLAR, HITACHI, VOLVO TRUCKS, VOLVO CONSTRUCTION, BELL EQUIPMENT, and many others.
