CHICAGO, IL, UNITED STATES, September 29, 2026 / EINPresswire.com/ -- Alienwater Technologies LLC today announced the launch of ATLAS PI, a combat-sports training and fight-camp platform now available for iPhone on the App Store.

Developed for athletes and coaches across MMA, boxing, Brazilian Jiu-Jitsu, wrestling and Muay Thai, ATLAS PI was created to address the fragmented way combat-sports preparation is often organized.

Training schedules, recovery information, nutrition and weight management, performance history and opponent preparation may be maintained across separate applications, notes and conversations. Alienwater Technologies developed ATLAS PI around the premise that these areas are more useful when viewed as parts of the same preparation process.

“Combat-sports athletes don’t experience training, recovery, nutrition, weight and fight preparation as separate problems, so we didn’t believe their technology should treat them that way,” said a spokesperson for Alienwater Technologies. “Our goal with ATLAS PI is to make that preparation easier to organize and understand while keeping athletes and coaches responsible for the decisions that matter.”

The platform combines year-round training support with structured fight-camp preparation.

ATLAS PI includes Camp Architect, which helps organize training plans around an athlete's schedule and priorities, and Fight Intelligence, which provides a structured place for opponent preparation. Corner Talk supports athlete check-ins and daily context, while additional areas of the platform cover training planning and history, recovery, weight and nutrition, performance context and meal logging.

The company's product philosophy emphasizes supporting rather than replacing human decision-making. ATLAS PI does not require athletes to adopt a particular coaching methodology or use a wearable device, and proposed training decisions remain subject to athlete review.

Alienwater Technologies describes this approach internally as "Human Before Performance," reflecting the company's view that an athlete's daily context should remain part of how preparation is understood.

The platform is also designed for use outside an active fight camp. Athletes can organize training, recovery and performance history between competitions and continue using the same system when they transition into structured camp preparation.

ATLAS PI includes a free Guest Fight Lab with a Round Timer, Six-Lane Chronometer, Push Pace and VO□ field-test estimate. Additional connected planning, training, recovery, nutrition and performance features are available through ATLAS PI Premium.

In the United States, Premium is offered at US$149.99 annually or US$19.99 monthly. Eligible Monthly subscribers may receive an introductory first month for US$9.99. Apple determines offer eligibility and applicable storefront pricing.

Privacy and athlete control were also incorporated into the platform's design. Optional data connections are presented separately, and athlete and coach roles are designed to maintain distinct access rather than assuming that athlete information should automatically be shared.

The iPhone launch represents the first public release of ATLAS PI and the beginning of Alienwater Technologies' effort to develop software specifically around combat-sports preparation rather than adapting a general-purpose fitness platform to the category.

ATLAS PI is available now for iPhone on the App Store.

About ATLAS PI

ATLAS PI is a combat-sports training and fight-camp platform developed by Alienwater Technologies LLC. The platform is designed for MMA, boxing, Brazilian Jiu-Jitsu, wrestling and Muay Thai athletes and coaches, connecting training, camp planning, recovery, nutrition, opponent preparation and performance context.
