Cinnova Technologies Named an OpenAI Select Partner

Cinnova joins the OpenAI Partner Network as a Select Partner, helping organizations put GPT-6 Astra to work at scale.

Cinnova Technologies Named an OpenAI Select Partner

CINCINNATI, OH, UNITED STATES, September 29, 2026 / EINPresswire.com/ -- Cinnova Technologies, an AI-native software development company, today announced that it has been named an OpenAI Select Partner within the OpenAI Partner Network.

The OpenAI Partner Network is a global program for partners to build, sell, and deliver AI solutions with OpenAI. It brings together partners with deep industry expertise, delivery capabilities, and customer relationships while equipping them with resources, enablement, and support to help enterprises adopt OpenAI frontier models and products and turn them into measurable impact.

As an OpenAI Select Partner, Cinnova will continue working with OpenAI to help organizations build, deploy, and scale AI solutions responsibly and effectively. This work will help organizations put GPT-6 Astra to work across more of their business, using deeper reasoning and computer use to complete complex workflows and deliver finished work. Cinnova helps organizations identify opportunities where intelligent automation, modern data architectures, and AI can drive measurable business outcomes and long-term growth.

"OpenAI is helping shape the next era of enterprise computing, and Cinnova is proud to join the OpenAI Partner Network as an OpenAI Select Partner. This designation deepens our ability to architect and deploy intelligent, agentic systems tailored to our clients' proprietary workflows. By combining OpenAI's frontier AI capabilities with our agile development and engineering expertise, we're helping small to midsize businesses deploy AI with greater confidence," said Jeff Holtmeier, Executive Chairman, Cinnova Technologies.

Cinnova supports organizations across healthcare, financial services, retail, logistics, manufacturing, and technology with AI-native software engineering, custom application development, mobile ecosystems, intelligent automation, and modern data solutions. Its work includes designing, building, and scaling custom software platforms engineered for an AI-driven world, while helping organizations turn complex operational bottlenecks into clear, lasting competitive advantage.

Looking ahead, Cinnova plans to expand its OpenAI-powered offerings, invest in AI talent and enablement, develop new AI-driven solutions, and scale customer deployments, helping customers translate AI ambition into business outcomes.
