IT Governance releases COBIT® 5 Documentation Toolkit

/EINPresswire.com/ IT Governance Ltd, the single source provider of IT governance books, tools, training and consultancy has released its own, independently developed COBIT® 5 Documentation Toolkit (www.itgovernance.co.uk/shop/p-1305.aspx).

COBIT 5 is the latest version of the ISACA® control framework for the Governance of Enterprise IT. COBIT 5 consists of 5 process domains and 37 processes – and implementation of each of these processes requires a number of policy and other documents to be drafted and agreed.

"This toolkit does not replace the official COBIT 5 books published by ISACA", says IT Governance CEO, Alan Calder. "In fact, those looking to implement COBIT 5 should always start with the official guidance and progress from there. This toolkit saves you time in your implementation process."

This COBIT 5 Documentation Toolkit simplifies the task of developing the range of policy and procedural documentation that you're likely to need if you're implementing COBIT 5. The size of the task in creating all the base documentation required is one of the reasons that COBIT implementation projects are sometimes very challenging.

Drawing on a decade of its own experience in IT governance, as well as ITGP's established skills in publishing independent, easy-to-use, customisable policy and procedure documentation templates, this COBIT 5 Documentation Toolkit will help you accelerate your IT governance project, while helping you avoid documentation dead-ends or re-inventing the procedural wheel.

This documentation toolkit includes:

- Corporate Governance of ICT Policy and Charter
- Roles and Responsibilities for Governance & Management of the ICT Framework
- Terms of Reference for Strategy and Steering Committees
- Job Descriptions for ICT Manager, ICT Champion
- Risk Management Policy
- ICT Strategic Plan
- ICT Implementation Plan
- Internal Audit Plan for ICT

- ICT Portfolio Management Framework
- Information Plan
- ICT Security Policy
- Business Continuity Policy
- ICT Continuity Policy
- Change Management Policy and Plan

This toolkit is designed so that it can be integrated with other ITGP toolkits, including the ISO27001 ISMS Documentation Toolkit and the ISO22301 Business Continuity Management System Toolkit.

Order your copy of the COBIT 5 Documentation Toolkit today from: www.itgovernance.co.uk/shop/p-1305.aspx.
