

# Qatar to host the latest developments in Refining Technologies & Strategies in June 2013

---

/EINPresswire.com/ Refinery Technology has grown increasingly in the last 20 years to stay ahead of the challenges of tight competition, strict environmental regulations, and low-margins and at the same time to answer the rising demand of production which pushes the refining industry for sustainable development and innovation.

The 3rd Global Edition of Refining Technologies and Strategies Workshop organized by [Praxis Global Research](#) will take place from 3-5 June 2013 in Doha, [Qatar](#) highlighting the major issues such as expanding and upgrading refineries to achieve the optimum processing facilities, enhancing product specifications and quality, improving efficiency of operations, achieving strike through emissions standards and the refining petrochemical integration. This interactive technology workshop provides the discussion a platform for sharing the real life case studies to create opportunities out of the challenges that worries the refining industry and its future.

Praxis Global Research is working alongside the Steering Committee to discuss factors that affect the refinery industry. Achieving the improved processing facilities and meeting the Best HSE elements in the refineries are the key objectives for ensuring the Refinery Optimization.

The 3 day workshop will feature an interactive platform of real life case studies through informative master classes and interactive sessions.
