

Zuvo Water Launches on BJ's Club

/EINPresswire.com/ [Water Filtration](#) Innovator Continues to Add Major Distribution Partners

[Zuvo Water](#) LLC, a global innovator of intelligent, water filtration products announced that select products are now available on BJ's Wholesale Club website (www.bjs.com). This latest distribution channel continues the company's steady year-to-year growth of adding new online partners, which currently includes Amazon.com and Costco.com in the U.S., as well as Costco.ca and WaterDirect.ca in Canada.

The smartly designed [Zuvo Water Filtration Systems](#) fit in any kitchen and are available in countertop and under counter configurations. The systems replicate nature's way of cleansing water with a 5-step patented process to produce clean, healthy water. In addition to the benefits of providing safe and great tasting drinking water from the tap, the product also reduces the expense and waste of bottled water by not adding to the more than 60 million plastic water bottles that end up in landfills every year.

Headquartered in Westborough, MA, BJ's Wholesale Club, Inc. is a leading operator of membership warehouse clubs in the Eastern United States. The Company currently operates over 190 Clubs in 15 states from Maine to Florida. Membership benefits at BJ's include savings of more than 30% off supermarket prices, acceptance of all manufacturers' and BJ's own coupons, and convenient one-stop shopping for thousands of products for home and business.

"The interest and demand for Zuvo Water Filtration Systems has enabled us to rapidly increase our distribution to major retailers and wholesalers such as BJ's Club," stated Andy Butler, CEO of Zuvo Water. "We are excited about this opportunity to have a new partner carry our innovative products."

About Zuvo Water

About Zuvo Water

Headquartered in Reno, NV, Zuvo Water LLC is the global innovator of intelligent, water-filtration products which redefine the hydration experience in the home. Their unique consumer product portfolio is based on a patented technology system that reproduces the photo-oxidation process naturally occurring in the environment.
