

Nephos Technologies Included in Gartners 'Cool Vendors in Cloud Services Brokerages, 2013'

/EINPresswire.com/ Nephos Technologies, a leader in [Cloud Services Brokerage](#), is proud to announce that it has been included as one of only four "Cool Vendors" by leading analyst Gartner in their "Cool Vendors in Cloud Services Brokerage, 2013"

Nephos Technologies, a leader in Cloud Services Brokerage, is proud to announce that it has been included as one of only four "Cool Vendors" by leading analyst Gartner in their "Cool Vendors in Cloud Services Brokerage, 2013" report published on 18 April 2013 by Tiffani Bova, Daryl C. Plummer, et al.

According to the Gartner report Key Findings, "Gartner estimates show that approximately \$100 billion will be spent worldwide annually on combined cloud services brokerage (CSB) roles by year-end 2014 and small startup companies are driving much of today's innovation in CSBs and CSB enablement through both technological advances and business consulting practices" "Cool Vendors in Cloud Services Brokerage, 2013" report published on 18 April 2013 by Tiffani Bova, Daryl C. Plummer, et al.

"Being chosen as one of Gartner's Cool Vendors is the culmination of hard work and drive to push innovation within a growing market. We believe it's a testament to the unique approach that we have to delivering [Cloud Brokerage](#), and validates the challenges that we believe organisations have when trying to manage Public, Private and Hybrid Cloud infrastructure," said Michael Queenan, Co-Founder of Nephos Technologies. "Our business is built on innovation, and we're continuing to develop the [Nephos Constellation](#) platform so that we can continue to meet the demands of our customers." Queenan continues, "the platform will enable enterprises and service providers to deploy services in the most appropriate locations (Private/Public/Hybrid Cloud Infrastructure) whilst giving a level of governance, automation and optimisation that isn't currently available in the market. The main difference in our platform is that it was built on business processes from the ground up, so non-IT staff will be able to use it just as easily – which will mean a truly self service portal."

Nephos Technologies' Constellation platform will set the standard in the cloud brokerage market as it will be the only solution that provides the full end-to-end infrastructure lifecycle

management of private, public and hybrid cloud; from decision engine to migration to management/automation to monitoring to on-going optimisation.

About Nephos Technologies

Nephos Technologies is an independent Cloud Services Brokerage (CSB); providing consultancy, management and technology services to organisations seeking to develop, implement and optimise their cloud strategy.

Nephos Constellation supports the following Public Clouds: Amazon Web Services, AT&T Synaptic Storage, Bluelock, Cloudscaling OCS, CloudSigma, EMC Atmos, GoGrid, Google Storage, HP Cloud Services, Joyent Cloud, Rackspace, Tata InstaCompute, TerreMark and Windows Azure.

And will also support the following private cloud environments as well. Citrix CloudStack, Eucalyptus, Openstack, VMware vSphere, VMware vCloud Director
