

# A World of Haypi Monsters. Catch 'Em All. Make Them Yours.

/EINPresswire.com/ Shanghai, China - Gamers are thrilled with the release of [Haypi Monster 1.2.2](#), a Pokemon-based MMORPG by Haypi Co., Ltd.

Haypi Monster features over a hundred monsters that players can battle, capture, train, and breed. Each monster's powers come from one of eight elements, and each monster has its own unique set of skills and evolution cycle. Players can attack their foes with the forces of fire, water, electricity, and more!

Players will journey through perilous adventures with their monsters, using power potions and healing jellies to assist them along the way. They must develop strategies to use their equipment, resurrection cards, and loaded dice efficiently.

Players can even battle each other. Haypi Monster features two forms of PVP: the PVP Arena and the Ladder Tournament. Players can get incredible prizes from entering the PVP Arena and can even team up with a friend for a four-player fight! Victors in the Ladder Tournament will be able to show off their crowns in the chat room.

Players can create extremely powerful monsters through synthesis and breeding. Ordinary monsters can be synthesized together into a single, rare and powerful beast with the power of synthesis scrolls. Players can then breed their strong monsters together to get a baby monster of epic proportions!

The monsters of Haypi Monster come in a variety of shapes and sizes. The cute, clam-like Chowda will win you over with its big blue eyes while the dragon Draconius will terrorize its enemies with its massive size and wingspan. All these monsters can be yours! Catch them, train them, teach them new skills, and bless them with incredible power.
