

Haypi Monster: A MONSTERous Challenge

/EINPresswire.com/ Shanghai, China - Haypi Monster, the newest MMORPG released by Haypi Co., Ltd, has received many positive reviews from both experts and players alike. An expert review by Tapscape calls Haypi Monster "monstrously good fun" and praises it for its featured scenes, hundreds of levels, and assortment of monsters. Over a hundred magical creatures dwell in this monster-filled world, waiting for the day their owners arrive. These monsters can be battled and captured, bred and blessed.

Haypi Monster is a two-in-one game that combines strategy with luck. Each monster belongs to one of eight element types and certain elements have advantages over others. A rock-type monster like Blocky experiences a two-fold power increase when fighting an electric-type monster like Fright. When encountering the plant-type Bloom, however, Blocky becomes extremely vulnerable.

Each monster can have up to four skills at a time, and these skills are divided into attack skills and supplementary skills. Attack skills do varying amounts of damage while supplementary skills can heal a monster, temporarily increase its stats, or even put the opponent monster to sleep. Players have to muster all of their game knowledge in order to be the best, whether it be through PVE challenges or the PVP Arena.

Luck comes into play during PVE challenges. Players enter each game level by hopping along a dice board and landing on one of five different squares: a treasure square, a buff square, a portal square, a discount sale square, and a battle square. Each square a player lands on can make or break their final boss fight, which, if completed, grants the player a spin of the Rewards wheel for incredible prizes like breeding potions and synthesis scrolls.

Tens of thousands of players from all around the world have poured into Haypi Monster. In just a short period, Haypi Monster has filled 35 global servers and 30 domestic servers with players who are busily battling, collecting, and breeding their new monsters. Haypi Monster's hundreds of activities and its colorful design certainly make it appealing for any avid gamer.
