

Beleza Medspa Austin TX Introduces a Natural Facelift Alternative With the NeoJuvencescence Lift

/EINPresswire.com/ Beleza Medspa Austin TX is proud to introduce a new facelift alternative procedure, the [NeoJuvencescence Lift](#). Utilizing the body's own ability to heal itself, the NeoJuvencescence Lift combines both surgical and nonsurgical procedures to produce natural results.

The results of traditional facelift surgery are well known. It's not hard to figure out who had a facelift, with the unnatural, pulled-back appearance it produces. Even worse, facelifts leave big scars, are expensive and require general anesthesia. Considering the cost, risks and results, the facelift is a procedure that has seen better times. "The traditional facelift like many cosmetic surgery procedures, is out of sync with what patients want in 2013," reports Dr Lawrence [Broder](#) MD, medical director of Beleza Medspa. "Patients do not want to go under, pay exorbitant fees, have big scars and have artificial results," he reports.

What if it's possible to harness the body's unique ability to heal itself to produce a more natural facelift? The NeoJuvencescence Lift just does that.

Combining a series of cutting edge surgical and non-surgical procedures, the NeoJuvencescence Lift restores youthful facial volume and contours while draping freshened and tighter skin over it. "What we noticed over the years performing each of these procedures, is that when we combined them, results were multiplied", reports Dr Broder.

Performed entirely under local anesthesia with minimal sedation, the NeoJuvencescence Lift is safe and effective. The procedure begins with [fat transfer](#) that harvests stem cell rich fat from a donor site. Attention is then turned to the chin and neck area where Smartlipo Laser Liposuction is performed. This phase of the treatment removes double chins, tightens neck skin and reduces the jowls. A blood sample is then drawn to isolate platelet rich plasma (PRP). PRP contains a wealth of natural growth factors that can stimulate stem cells and induce tissue repair.

The final phase of the procedure involves DOT therapy laser resurfacing and facial fat transfer. A

CO2 fractional laser is used to remove the upper layer of skin containing visible sun damage as well as providing overall skin tightening. The previously harvested fat is then transferred to the face to rebuild cheek and brow volume and youthful contours. Finally, the PRP is applied throughout the face to stimulate the stem cell differentiation into new cells and induce tissue repair.

The results of the NeoJuvencescence Lift are nothing but dramatic. The skin looks tighter and fresher, the cheeks and brow appear fuller while the jawline and chin are better defined. This is all accomplished by using only the body's ability to repair itself. No artificial fillers, large incisions or general anesthesia is necessary. Just natural results with natural face lift alternative!

Dr Broder adds, "The NeoJuvencescence Lift combines a series of rejuvenation procedures that are on the cutting edge of cosmetic surgery. It utilizes your own fat, stem cells, growth factors and skin cells to do all the work. Our goal is to restore youthful upper facial volume while removing the excess lower facial volume of aging. We also stimulate the skin to rebuild collagen and tighten so it drape better over the new facial contours," he reports. "Unlike the facelift that just treats the symptoms, the NeoJuvencescence Lift actually treats the underlying problems that we see as aging."

The name NeoJuvencescence Lift was chosen quite deliberately to reflect the nature of the procedure. Juvencescence means growing young and Neo is defined as new. So the NeoJuvencescence Lift reflect a new ability to grow young!

Beleza Medspa is a cutting edge cosmetic surgery and aesthetic practice located in Austin TX. With 5 offices in Austin, Round Rock and Cedar Park TX, Beleza Medspa is among the leaders in Botox, Juvederm, Radiesse, Smartlipo Laser Liposuction, Brazilian Butt Lift, photofacials, HCG diet, Bioidentical Hormones and more.
