

FreeGuns.biz Helps Visitors Legally Obtain Handguns Without A Background Check Or Serial Numbers

/EINPresswire.com/ FreeGuns.biz offers details on manufacturing handguns, machine guns and silencers as well as information about legal issues and rights.

Orange County, CA - With the media and politicians screaming for more and more gun control legislation, it's becoming increasingly difficult for law abiding citizens to arm and protect themselves. The new website

FreeGuns.biz is taking aim at those who would infringe upon the rights of the people by offering information on obtaining [handguns without a background check](#).

FreeGuns.biz offers visitors the information they need to manufacture their own firearms without a background check.

"What makes our site unique is that we've gathered all of this information in one place. People who don't want to worry about background checks due to the Brady law, or concern themselves with serial numbers or other means of tracking their weapons, can find everything they need to manufacture their own firearms right on our site. For the cost of materials and with some basic skills, anyone can make their own [free guns](#) right in their home," said Steve Smith, President and CEO of Freeguns.biz (<http://freeguns.biz>).

In the past, much of the information found on FreeGuns.biz has only been available by scouring countless, less reputable sites, and even then readers would have to know a great deal about guns to begin with. Smith's new site offers gun enthusiasts easy access to all of the information they need to manufacture their own weapons, assess their legal options and obtain the necessary gun making tools and materials.

In the near future FreeGuns.biz also hopes to host instructions in the form of a free software download that will allow users to manufacture their own handguns using little more than a computer, a hobby mill and raw materials. The download will provide the CNC machining code needed to [machine a handgun](#) from commonly available metal stock.

"I launched FreeGuns.biz with the intent of providing everyone continued access to the guns that are guaranteed to us by our constitution. Some members of the anti-gun movement seem set on stripping us of our right to bear arms and I'm determined not to let that happen. There may come a point when the only way to get a gun is to make it yourself, and the information

necessary to do just that should be made available to everyone," says Smith.
