

NewGen Business Solutions Announces Expense Management System To Integrate With Sage ERP

/EINPresswire.com/ NAPERVILLE, IL -- [NewGen Business Solutions](#) has announced a new software solution for business procurement. eRequester® is an intuitive web-based purchasing and expense management system that integrates with Sage [accounting software](#) to improve and expedite business procurement practices. NewGen is a licensed reseller of Sage software.

The eRequester program gives organizations the ability to request, approve and create Purchase Orders and Approved Payment Requests from an easy-to-use intuitive browser-based interface. The program is completely web-based and integrates with Sage 100, 200, 300 and 500 systems.

"eRequester, when coupled with Sage accounting software programs, puts accounting data at employees fingertips. The software provides email alerts, offers automated workflow processes, and gives management the flexibility and control over spending that they need to make business decisions," explained Richard Kostopoulos, President and CEO, NewGen Business Solutions (www.newgennow.com).

eRequester software allows businesses to manage procurement, purchase requisitions, authorization routing and purchase orders in a web-based environment. The system is highly customizable, giving users the ability to pick and choose the features they need. Key modules include: budgeting, expense management, receiving, inventory management, requests for quotes, mobile applications, project accounting, multi-currency and payment requests.

"eRequester eliminates many of the control issues that businesses face with paper-based systems. Since the system is web-based, everything can be done online. Requests can be entered from an employees' workstation and eRequester automatically routes it to the appropriate manager for approval. Once they're approved, requisitions can be converted to purchase orders, which can then be emailed to vendors. When integrated with Sage, real-time information helps managers make critical purchasing decisions and expedite the procurement process," explained Kostopoulos.

NewGen Business Solutions has announced an add-on for Sage ERP accounting software, called eRequester. Also offering other business accounting software in Chicago, NewGen products help users improve their operational efficiency and accuracy.

In addition to Sage products, NewGen Business Solutions offers complete accounting software integration in Chicago. The company's enterprise solutions include Sage ERP and Accounting software, MRP, Distribution, and Manufacturing. The company offers training, implementation and support for all of their systems and takes great pains to educate their clients not only about the business systems they are purchasing but the technologies behind them. Each of NewGen's business systems is designed to improve organizational efficiency and their clients' bottom line through the use of innovative technology.
