

TempSys Attending the AAMI Conference on June 1-3 in Long Beach, CA

/EINPresswire.com/ TempSys, the leading provider of real-time [wireless monitoring](#) and tracking solutions, will be attending this year's Association for the Advancement of Medical Instrumentation (AAMI) conference taking place June 1-3 in Long Beach, California.

TempSys, the leading provider of real-time wireless monitoring and tracking solutions, is pleased to announce that they will be attending this year's Association for the Advancement of Medical Instrumentation (AAMI) conference. The conference is taking place June 1st through June 3rd and will be held in Long Beach, California.

"This is a great opportunity to meet current and future customers who are the professionals who manage, purchase and support healthcare," said Robert Yuan, Founder and CEO, TempSys. "It's also a unique event where manufacturers, distributors, purchasers and managers of medical solutions can exchange information and ideas about the latest technologies and industry developments such as our Fetch Real-Time Location System ([RTLS](#)) which offers the highest resolution and accuracy in the market today."

The Fetch RTLS system being presented at AAMI offers true enterprise visibility. The real-time monitoring of equipment, patients and staff enables par level tracking and management of assets, and captures utilization rates while trending workflow patterns. Fetch makes it easy for customers to make impactful decisions based on insightful information that simply was not previously available.

In order to provide a complete solution to customers, TempSys' Checkpoint [Temperature Monitoring](#) system is designed to use the same wireless infrastructure as Fetch allowing reduced infrastructure costs and faster ROI. Hosted on a common application server, TempSys also offers seamless integration with a facility's existing infrastructure including 802.11 b/g Wi-Fi, Distributed Antenna System (DAS), Apogee™, and Metasys™. Standard protocols such as HL7, Modbus, and

BACnet are also seamlessly integrated and supported.

Come visit us at Booth 747 and we'll show you the latest developments in real-time monitoring and tracking solutions.

About Tempsys

Founded in 2002 and headquartered in Emeryville, California, TempSys, is a leading provider of real-time enterprise monitoring and tracking solutions. Our Fetch™ RTLS and CheckPoint™ wireless monitoring systems are seamless enterprise solutions for temperature and vital parameters monitoring, cold-chain management, RFID inventory management, asset visibility and workflow optimization. Serving over 250 hospitals, laboratories, pharmaceutical, biotechnology and other companies nationwide, TempSys is a recognized leader in solutions to safeguard product integrity and to protect and manage an organization's vital assets.
