

TSI Announces 2013 Respiratory Protection Roadshow Training Dates and Locations

/EINPresswire.com/ [TSI](#) is pleased to announce that industry recognized instructor, Dr. Roy McKay of the University of Cincinnati, is again teaming up with TSI to offer the most comprehensive respiratory protection training in a one-day course at various locations throughout the country.

TSI is pleased to announce that industry recognized instructor, Dr. Roy McKay of the University of Cincinnati, is again teaming up with TSI to offer the most comprehensive respiratory protection training in a one-day course at various locations throughout the country.

Designed for all levels of experience, this expert will cover current standards regulating respiratory protection, approved fit testing methods and correct techniques to administer and maintain a successful respiratory protection program.

Proper respiratory protection is a common, increasing problem. In 2012, Respiratory Protection was cited by OSHA as #4 most cited violations and penalties, up from #5 in 2011. In an effort to advance your risk management program, and ensure your compliance with government regulations, the TSI-sponsored respirator protection workshop presents a thorough overview of OSHA Respiratory Protection Standard (20CFR 1910.134), as well as guidelines as to when respirator testing is necessary. Plus, attendees will receive valuable hands-on quantitative fit test (QNFT) training utilizing the TSI [PortaCount® Respirator Fit Tester](#) as well as qualitative fit test (QLFT) training with the TSI [Qfit™ Respirator Fit Tester](#). Discussion on how to interpret results from each method and common mistakes in that interpretation will be included.

To see a complete listing of cities and dates available, and to register to receive more information, visit www.tsi.com/roadshow2013.

About TSI Incorporated

TSI Incorporated serves a global market by investigating, identifying and solving measurement problems. As an industry leader in the design and production of precision instruments, TSI partners with research institutions and customers around the world to set the standard for measurements relating to aerosol science, air flow, health and safety, indoor air quality, fluid
