

# Benefits Planning Service Making Employee Benefits Easier With New Website

/EINPresswire.com/ Benefits Planning Service (BPS) located in Newport Beach, CA is proud to announce the unveiling of its new website at <http://benefitsplanningservice.com> The site is designed to make it easier for clients and potential clients to stay compliant with the new healthcare laws.

Benefits Planning Service, or BPS, are a full service [employee benefits broker](#) and consulting firm. They have been in business for over 30 years helping their clients with fully-insured and [self-funded insurance plans](#), the latter being their specialty. Up until recently, the company has had very little presence online, but they have decided that now is the time to use their website to better serve their clients.

The New website is nice to look at, but that is not what the company is most excited about. There are two things that they feel will really help both their existing customers and businesses that are looking to save money on their employee benefits. The first thing that Benefits Planning Service is offering is very exciting for companies looking to streamline their benefits. BPS is offering clients a 30 day trial to Zywave's MyWave Client Portal. This gets users access to time saving tools, makes benefits related tasks more manageable, allows users to collaborate with experts and over 325,000 HR peers, as well as providing a convenient place to stay up to date on the latest news, information and resources.

The second feature of the new website that the company is excited about is the 2013 Compliance Checklist that they are offering for free. This 4 page report will help companies make sure that they are staying compliant with all of the new laws and regulations, and with the [Affordable Care Act](#) starting up, many businesses do not realize how the laws are changing. Two of the more popular topics discussed in the report are Grandfather Plan Status and Annual Limits. These are issues that benefits brokers should go over with their clients, but BPS finds that they often do not. Because of that, BPS offers this short report to help companies to make sure that they are staying compliant.

BPS is always looking for ways to better serve their customers and the new website is the latest step in that process. Their goal is to save their clients both money and the hassle that it takes to ensure that they are staying compliant with their benefits plans.

## About Benefits Planning Service

Benefits Planning Service is a full-service employee benefits consulting / brokerage firm, with over 30 years of experience in both fully-insured and self-funded employee benefits. Our clients include companies varying in size from a few employees to several thousand, and from a diverse mix of industries. BPS is dedicated to developing strong working relationships with their clients, by providing the highest levels of service and benefits planning.
