

VOICETRUST ANNOUNCES ITS STRATEGIC MOVE TO CANADA

/EINPresswire.com/ Toronto Amsterdam, May 16, 2013 VoiceTrust, a
global leader of voice biometrics
technology and mobile payment
solutions announced today that it will
shift its operational headquarters to Canada.

VoiceTrust, a Dutch company with offices in Germany, US, Dubai, Pakistan and Canada is majority owned by Ramphastos Investments, the investment vehicle of Dutch serial investor Mr. Marcel Boekhoorn. Last year, VoiceTrust acquired Canadian technology firm Perceive Solutions and established an exclusive R&D relationship with Montreal based CRIM, one of the most prominent biometrics research facilities in the world.

VoiceTrust will operate out of both Toronto and Montreal and will add a minimum of twenty additional full time positions, on both the technical and commercial sides, and this, effective immediately.

Voice biometrics technology has been used over the past decade in real-world security applications in several industries. VT's customers include many Fortune 500 companies including banks, insurance providers, telecom operators, large enterprises and public sector companies.

"With growing demand for (robust and highly secure) remote authentication in private and public cloud applications, contact centers and mobile payments, voice biometrics technology has become the obvious choice. The outlook for 2013 is very exciting for VoiceTrust and the voice biometrics community as a whole," said Dr. Tariq Habib, CEO of VoiceTrust.
