

Leawo Officially Launched the Best Blu-ray Player Software Tested by 50,000 Users for Windows 8 at \$19.95 Only

/EINPresswire.com/ Shenzhen, China, May 21st, 2013 – Leawo Software, a leading multimedia solution provider specializing in processing and broadcasting media over the internet and in the daily life as well, officially announced the release of the best Windows 8 Blu-ray player software – [Leawo Blu-ray Player](#). This brand-new Blu-ray player software is enjoying a big price cut, only \$19.95, to celebrate its final birth. Leawo also adds 3 other Blu-ray solutions into this special offer activity for Blu-ray movie fans to save up to 50%.

As a professional and all-in-one media player combo, Leawo Blu-ray Player acts more than a single Blu-ray player to play back Blu-ray discs and movies. It is also a [free DVD player](#), free video player and free audio player, providing permanent free service for movie fans to play DVD, video (including 1080P videos) and audios without quality loss. It delivers DTS-HD Master Audio and Dolby Digital 5.1 Audio to movie fans while playback. The comprehensive playback navigation makes Leawo Blu-ray Player easy to use.

Leawo has always been concentrating in providing user-oriented multimedia solutions to help movie fans improve movie experience. Based on this, Leawo launched its Blu-ray Player Beta Test (<http://www.leawo.com/promotion/blu-ray-player-beta/>) before the official release of Leawo Blu-ray Player, to receive opinions, reviews and comments from worldwide movie fans to optimize this new Blu-ray Player software. Over 50,000 movie fans joined in the test and review. Quite a lot of wonderful optimizing advices were accepted by Leawo in the final version of Blu-ray Player. Leawo Blu-ray Player received mostly positive reviews.

"Very impressed with the minimalist interface. Playback was crisp and clear. Audio was fantastic. As noted by other reviewers, subtitles were on by default. While this may bother some people, I generally prefer to watch my movies with them on...so this was really not an issue for me. On the whole, I enjoy this player, and even if it doesn't boot the disc upon insertion, this isn't that big a deal."

"It plays back blu-rays pretty well. I also like how i can choose my audio output method because sometimes I output my audio and video to my TV through my HDMI port on my video card. The one thing I do not like and absolutely can not stand about this program so far is that when trying to navigate in the disk menu there is no support for mouse clicking! This means that i have to navigate with the arrows on my keyboard. This would not be a problem except the arrows also fast forward and rewind and for some reason when i navigate through the menus and select what I want to see, it plays my selection in fast forward. When I try to go back to normal speed the sound does not play. If i could select what I want in the menus with my mouse then this would not be a problem. Or if i could change what the keyboard buttons do but so far I haven't figured out how. Please fix this!"

As a return to Leawo's long-term supporters and participators of the test, Leawo decided to premiere Leawo Blu-ray Player with up to \$40 price cut, originally priced at \$59.95, 67% off discount. To perfect Blu-ray movie experience, 3 other useful Blu-ray solutions from Leawo are discounted with 50% off: Blu-ray Copy, Blu-ray Ripper and Blu-ray Creator. People purchase any one of the 3 Blu-ray solutions could enjoy the 67% off discount of Leawo Blu-ray Player.
