

World's Easiest Back Pain Relief Device, WonderTrack

/EINPresswire.com/ Los Angeles, CA - May 20, 2013 -- USA manufactured and Invented by an Orthopedic Doctor, the [Wondertrack's®](#) a [Back Pain Relief](#) device, patented design with curved sides and flat straight line center axis receives the body and cradles it from the shoulders to hips. The Wondertrack® serves as a relaxation aid and exercise facilitator. It reduces muscle pressure and relieves back pain in as little as 10-20 minutes. Back pain continues to be a major issue across the United States and is the #2 problem that brings people into the doctor's office. Many spinal conditions cause back pain, but muscle sprains and strains can cause it as well. Each year, back pain is costing Americans around \$50 billion in medical bills, disability, and lost productivity.

WonderTrack - Back Pain Relief Device

Wondertrack is one piece and uses gravity aided alignment needing no moving parts such as traditional traction devices. The device's curved surface utilizes your body weight and pushes your spine inward for fast alignment and back relief. For best results it is recommended to use deep breathing so your body will relax and form to the concave shape. The more you relax, the better Wondertrack relieves back aches and it is recommended to use a pillow and a thin blanket on the surface for comfort. The device comes with an instruction manual which includes exercises you can do while using the Wondertrack, as well as a DVD going step by step on how to use the device and exercise with it as well. Product Size is only 23.75" L x 16.5"W x 2"D, making it easy to store and travel with when you're at the office or on the road and need back relief.

Inventor Armen J. Dumas M.D. received his Bachelor of Arts in 1973 and received a Doctor of Medicine in 1977 from University of California, Los Angeles. Dr. Dumas is an AMA Board Certified specialist in Physical Medicine and Rehabilitation, Fellow at the American Academy of Physical Medicine and Rehabilitation since 1982, and also a member of the American Medical Association, American Association of Neuromuscular and Electro diagnostic Medicine and he is a recent past president of the California Society of Physical Medicine and Rehabilitation. Dr. Dumas is an Assistant Clinical Professor of Medicine at the David Geffen School of Medicine at UCLA.

He states: "I have treated hundreds of patients with chronic back pain, and suffer from back pain myself. I designed Wondertrack to provide my patients with an effective, non-medicated way to relieve their back pain between treatments. We have achieved great success with Wondertrack and are delighted to now offer this revolutionary device to you." Media:
