

# Lab88 Announces Labidorol Female Sex Enhancer Pill for Women

/EINPresswire.com/ Over 40% of women suffer from some form of [female sexual dysfunction](#), Labidorol is designed to help.

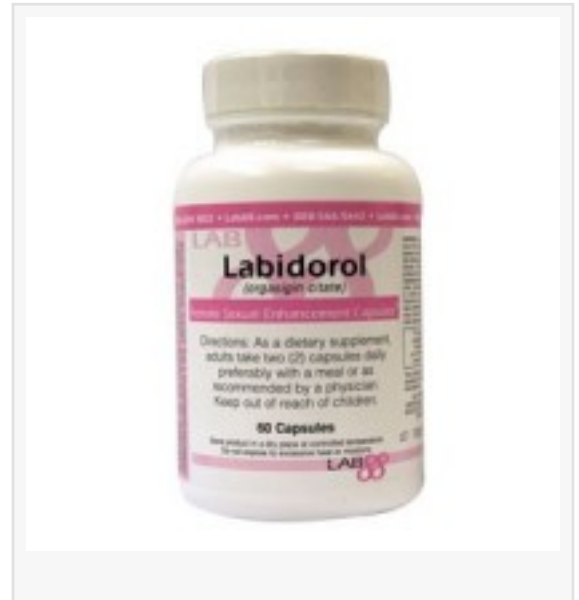

Female sexual dysfunction is common; reportedly 43% of women report some degree of sexual difficulty. The number may be even greater as women are often hesitant or embarrassed to discuss it with their doctor. Female sexual dysfunction (FSD) is when a woman encounters a problem during any phase of the sexual response cycle preventing her from experiencing satisfaction from the sexual encounter.

Symptoms of Female Sexual Dysfunction or FSD include the inability to become aroused, inhibited sexual desire, painful intercourse and lack of orgasm. Increased sex drive is desired by many women, yet most sex enhancement pills focus on increased performance for men. Labidorol was designed just for women. Labidorol is intended to confront the problems that women face head on. Women want to be able to have a more pleasurable sexual experience, both for themselves and their partner. Labidorol is designed to enhance each of the four stages of the arousal cycle.

Formulated with natural ingredients researched and known to aid [sexual function](#), Labidorol capsules are taken daily as a dietary supplement. Labidorol promotes enhanced sexual desire, and response time, increased [libido](#), and better orgasms.

Labidorol contains Yohimbe, a known and potent antioxidant, shown to promote sexual desire as well as weight loss by boosting energy, fat oxidation and metabolism. In addition, Labidorol contains a combination of Horny Goat Weed, Tribulus Terrestris, Tienchi Ginseng extract and other natural aphrodisiacs researched and intended to help promote a woman's sexual desire, libido, enhance orgasms, and enhance natural lubrication. What separates the ingredients in Labidorol compared to other female sex enhancers is the quality of the herbs and the extraction process.

Lab 88 is proud to report that Labidorol is hormone-free. All ingredients are naturally derived

and manufactured in an FDA approved facility operating under the strictest cGMP (Current Good Manufacturing Practices) guidelines for consumer safety.

Labidorol, by Lab88, is a natural, female sexual enhancement pill designed specifically for woman. Labidorol helps to restore sexual desire and libido with the combination of natural aphrodisiacs and extracts.
