

Haypi Announces the Release of Haypi Monster Version 1.3

/EINPresswire.com/ Haypi Monster's latest update has been approved by the App Store, and the Haypi Monster forums are abuzz with activity as long-time players eagerly discuss Version 1.3's newly-added updates.

In the week before the highly-anticipated release, thousands of thrilled players from all over the world flocked the forums in order to peruse the sneak peek and ask questions pertaining to the long-anticipated update. This detailed sneak peek unveiled 11 changes to the game, including never-before-seen features like item disenchantment, raiding opportunities with real-life friends, and Magic Eggs that hatch powerful legendary monsters.

The sneak peek also acted as a guide in teaching its long-term players how to properly utilize the game's newest features. Certain features, like the Pal system, are unlike anything Haypi Monster has ever done before. Players have step-by-step instructions that teach them how they could tie their accounts together with the accounts of their real-life friends.

Now that the new activities are available, players can maneuver smoothly through the new features. Advanced Skill Books, which were the most highly sought-after items pre-release, can now be disenchanting and exchanged for one another. This makes it easier for players to teach their epic monsters the right skills, so that they can prepare themselves for the most difficult battles they have ever faced. Legendary monsters like Cerberus, Leviathon, and Hydra await their new masters!

The Haypi Monster team is working diligently on the maintenance for Version 1.3. Haypi Monster Version 1.3 will be available once the maintenance period is over.
