

# The fastest way to ISO 22301 implementation - business continuity management documentation toolkit

---

/EINPresswire.com/ [IT Governance](#), the global leader in business continuity management (BCM) and [ISO 22301](#) compliance expertise, are advising organisations to save time and money by investing in the ISO22301 Business Continuity Management System (BCMS) Implementation Toolkit.

Implementing a Business Continuity Management System (BCMS) aligned to ISO 22301 (the international business continuity standard) enables organisations to identify threats relevant to them and make plans to address disruptive incidents.

Alan Calder, CEO of IT Governance, says: "Savvy organisations wouldn't wait for a disaster to strike. They would prepare themselves for the unforeseen and would be able to get back to business as usual quickly in case of a disaster.

"Thanks to ISO 22301 there is now an international guidance on developing a business continuity management system that will help you prepare for and recover from a disaster. Implementation aids like the ISO 22301 BCM toolkit are designed to facilitate and guide you through the process. They are cheaper than one day consultancy and ensure you build internal knowledge you can later draw upon."

The ISO 22301 [BCMS Implementation Toolkit](#) has been designed to help organisations implement the standard effectively and efficiently without the need to reinvent the wheel. It contains document templates and guidance that enable business continuity professionals to quickly and efficiently produce their own tailored versions of all these essential documents. It is also the optimal resource for organisations pursuing compliance with ISO 22301. A free demo of the toolkit is available at [www.itgovernance.co.uk/free\\_trial.aspx](http://www.itgovernance.co.uk/free_trial.aspx).

The ISO 22301 BCMS Implementation Toolkit can be immediately ordered online at [www.itgovernance.co.uk/shop/p-1039.aspx](http://www.itgovernance.co.uk/shop/p-1039.aspx).
