

AgeForce Offers Consumers Breakthrough Fat Burning Weight Loss Patch Formula

/EINPresswire.com/ AgeForce, the leading brand of Phase4 Pharmaceutical, LLC., is now offering an over-the-counter breakthrough fat burning and weight loss time-released transdermal patch.

AgeForce, the consumer brand of Phase4 Pharmaceutical, LLC., has released a breakthrough Weight-Loss Fat Burner Patch for consumers, adding to its extensive line of dietary supplements and transdermal patch products for the health and fitness industry.

The new Weight-Loss Fat Burner Patch, company officials say, has been specially formulated to burn body fat faster while also reducing and inhibiting the accumulation of new body fat. The new patch has been in the research and development stage at Phase4 Pharmaceutical labs for more than two years and is considered to be the most advanced and effective over-the-counter weight loss and fat burning supplement available. It is quickly becoming AgeForce's best selling new product in the vast weight loss supplement market category.

The unique formula behind AgeForce's new weight loss patch, says Phase4 Pharmaceutical CEO, Stephan Lapidus, coupled with its ability to help users to burn body fat, are proving to be highly successful. He says the new product is fast-becoming one of the most important new weight loss supplements on the market.

"One very important distinction between our Weight-Loss Fat Burner patch supplement and all of the other products out there is its effectiveness in ongoing weight management," Lapidus said. "Almost everyone that has lost weight with a diet or some other weight loss supplement has had the disappointment and frustration of regaining the weight they lost. Our new breakthrough patches are unique because they also help you keep the weight off after you lose it."

AgeForce offers a full range of dietary and body building supplements for the consumer market, including, a [natural testosterone booster](#), body building supplements and several other time-released patch products, which Phase4 Pharmaceuticals has been manufacturing since 1999.

The secret to AgeForce's new formula is indeed groundbreaking and proprietary to the new Weight-Loss Fat Burner patch. It is the only product on the market that combines 7-Keto DHEA, T2 and Tyr-Somatostatin in a time released transdermal patch, a formula that burns existing

body fat and keeps weight off after the body loses it. Medical professionals and clinical trials all suggest that time-release transdermal patches are the most beneficial method for direct delivery of medical and dietary supplement formulas.

Among the supporters of the new AgeForce patch is Carl Lanore, the host of Super Human Radio, the internationally syndicated health, fitness and anti-aging online radio podcast. Referring to AgeForce's new product he said "The AgeForce Weight-Loss Fat Burner patch represents the most advanced non-stimulant fat loss supplement and delivery system available today and the combination of T2, Tyr-Somatostatin and 7-Keto DHEA provides the public with the best weight loss supplement on the market."

The new AgeForce weight loss patch is specially formulated so that it will not cause a person to become hyper or jittery during use. In addition, to ensure the safety and pharmaceutical efficacy and quality of all of their supplements, all AgeForce supplement patch products are formulated, sourced and manufactured in their US FDA certified laboratories.

About Phase4 Pharmaceuticals and AgeForce: Phase4 Pharmaceutical and AgeForce® is a research and development pharmaceutical company specializing in formulating, manufacturing and distributing a full line of time-release transdermal patch dietary supplements for bodybuilding, weight loss, anti-aging, and overall health and fitness. Its inventory of health products include HGH supplements, weight loss supplements, as well as Creatine, B12, testosterone, DHEA, nitric oxide, Coenzyme Q10, Omega-3, and melatonin supplements.
