

Upper West Side Manhattan Dentist Reuven Mohl Straightens Teeth With Invisalign Clear Aligners

UPPER WEST SIDE, MANHATTAN, NEW YORK, June 4, 2013 /EINPresswire.com/ -- Dr. [Reuven Mohl](#) DDS of Manhattan's Upper West Side [Gentle Dental](#) PC, is proud to announce the availability of the treatment of Invisalign, clear plastic aligners to help patients achieve straighter, healthier, more attractive smiles.

Invisalign uses clear plastic aligners that fit in the mouth much like a mouth tray. A carefully customized treatment plan ensures each stage of treatment uses specific, precise movements that gradually move the teeth into healthy alignment. Treatment lengths vary depending on the severity of teeth crookedness. There are treatment express options for minor movements where treatment can be completed in only 10 weeks.

Orthodontic problems can cause dental health problems, along with long-term complications that include gum disease, tooth decay, abnormal wear patterns and TMJ disorders. Dr. Reuven Mohl straightens the crooked teeth or bite abnormalities that can interfere with the health or function of the smiles and thereby improving the overall health of the mouth.

Dr. Mohl, cosmetic dentist in Manhattan, also offers other treatments that can improve the health and appearance of a smile. These services include porcelain veneers, teeth whitening, cosmetic bonding and contouring. He also provides routine dental services such as white dental fillings, root canals, crowns, and sealants. Cleanings can be scheduled with the office hygienist. Implants are placed and restored in his dental office by a board certified periodontist.

Dr. Mohl earned his Doctorate of Dental Surgery at New York University College of Dentistry. He is a full member of the American Dental Association, the American Academy of Dental Sleep Medicine.
