

Lab88 Introduces Largininepro to Support Improved Cardio Health and Sexual Function

Largininepro is formulated with amino acids that convert to Nitric Oxide (NO), a gas that is vital for healthy circulation and cardio health.

NEW YORK, NY, June 5, 2013 /EINPresswire.com/ -- Americans today are very active or wish to be more active even as they age. Nobel Prize winners for Physiology in 1998 discovered the importance of [Nitric Oxide \(NO\)](#) for its positive effect on the cardiovascular system. Nitric Oxide relaxes and dilates the blood vessels and advances circulation, helping to prevent blood clots that prompt strokes and heart attacks. In addition, NO helps to lower blood pressure, cholesterol and the buildup of plaque in the blood vessels.

[Largininepro](#), Lab88's latest health supplement, is a powdered formula. One scoop daily of Largininepro is intended to help advance [cardio health](#), athletic performance, anti-aging benefits, as well as encourage lowering cholesterol, high blood pressure. The key ingredients in Largininepro are thought to boost sexual desire, improve circulation and immune function.

Largininepro is formulated with L-Arginine, L-Citrulline, Vitamins C, D, B12, B6, and K. Amino acids L-Arginine and L-Citrulline in combination are thought to help promote NO production, which is intended to help support and discourage blood clots that prompt strokes and heart attacks. The vitamins in the Largininepro formula boost the efficacy by helping to improve cardiovascular health, and red blood cell development. Vitamin B12 has been shown in studies, and is thought to help protect against cancers and guard against heart disease by improving unhealthy cholesterol levels, protect against stroke, and high blood pressure.

In addition to helping to improve cardio health, the ingredients in Largininepro are thought to assist in promoting increased virility and sexual function. Researchers predict that nitric oxide "can correct up to 90% of all penile dysfunction." Furthermore, researchers at Stanford University School of Medicine revealed that L-Arginine works to increase levels of NO in the body and is a credible indicator molecule for sexual arousal. Their study also demonstrated L-Arginine significantly improved women's sexual desire and overall sexual satisfaction.

Largininepro is available online at <http://largininepro.com>. Special daily offers are available for multi-pack purchases and free shipping.

Largininepro by Lab88 is a proprietary combination of the amino acids L-Arginine and L-Citrulline

that promote increased production levels of Nitric Oxide to help support the cardiovascular system and improve sexual function.
