

Secure and Confidential Documents Ltd Chooses Risk Assessment Tool vsRisk to Accelerate ISO 27001 Project

ELY, UK, June 11, 2013 /EINPresswire.com/ -- [Vigilant Software](#), the information security risk management solutions provider, has today announced that Secure and Confidential Documents Ltd ([SCD](#)) has chosen the information security risk assessment tool [vsRisk™](#) to update and maintain their ISO 27001 compliant status.

James Ellis, IT Developer at SCD who provide data management, typesetting, proof reading, examination paper printing and digital print services in an ISO 27001 secure environment, explains "The security of printed and digital print client data is of utmost importance to SCD and our customers. With ISO 27001, our customers feel reassured that we have the infrastructure, procedures and systems in place to protect their data. The ISO 27001 standard means we are very proactive with audits and risk assessments which keep us away from potential problems - we can produce evidence, procedures and policies for most scenarios and therefore our customers trust us."

James Ellis continues "Compared to Excel, vsRisk has an easy to use interface. The assessment scales and the risk acceptance criteria are an easy to understand and visual way to present risks to the people. vsRisk is a great way to manage and report your risks and present the acceptance criteria to the board for eventual sign off. vsRisk comes with complete piece of mind, we used the technical support on offer and the support we received was great."

Alan Calder, Chief Executive of Vigilant Software, adds "We are delighted that SCD have chosen vsRisk to automate their information security risk assessments, saving vast amounts of time and resources. SCD join a long and growing list of high profile organisations worldwide that have chosen Vigilant Software as their cyber security partner of choice."

The full interview between Vigilant Software and James Ellis of SCD can be found at www.vigilantsoftware.co.uk/blog/an-interview-with-james-ellis-of-secure-and-confidential-documents-ltd.aspx.
