

Murfreesboro Good Feet Offers Plantar Fasciitis Foot Pain Relief With Good Feet Orthotics

Leading International Retailer of Custom-Fitted Arch Supports Brings New Approach to Foot Pain Relief to Murfreesboro Local Community

MURFREESBORO, TN, June 18, 2013 /EINPresswire.com/ -- Good Feet Worldwide, LLC., an international retailer of custom-fitted arch support, announced its foot pain relief process focusing on reducing plantar fasciitis foot pain and heel pain for Murfreesboro.

An estimated 87 percent of the general population suffers from foot-related problems, most of which can be linked to improper support for flat feet or high arches, wearing improper footwear, walking or standing on hard surfaces for long periods of time, being overweight or suffering from sports injuries. While many people looking for relief turn to the various arch supports and cushion products they see in retailers like drug and grocery stores, Good Feet takes the process to another level.

The Murfreesboro Good Feet's new plantar fasciitis foot pain relief process provides each customer with personal bio-mechanical balancing and measuring. The customer's primary activities and shoe style preferences are also taken into consideration prior to being personally fitted with arch supports that can provide them with the ultimate comfort, balance and support.

"The custom fitted arch supports changed my life. I had back issues, balance issues and pain in the ball of my foot. I am now pain free," said Cathey Lee Evans, owner of the Good Feet Stores in Middle Tennessee.

Good Feet Murfreesboro offers a non-medical solution to relieving foot pain, heel pain and plantar fasciitis through arch supports, insoles and cushions. As an alternative to painful medical visits, customers have found immediate relief from foot pain, heel pain, back pain and plantar fasciitis in Murfreesboro through the use of the Good Feet arch supports.

Good Feet Murfreesboro heel pain relief products are designed to support all four of the foot's arches, which makes the personal fitting process so important. Through better arch support, a person's body weight can be more evenly distributed, which maximizes stability and balance. The Good Feet Murfreesboro foot pain relief products are also designed to reduce pressure and eliminate foot pain, knee pain and even back pain.
