

ELVIS ANGYIEMBE TO SPEAK AT INTERNATIONAL LAW INSTITUTE IN WASHINGTON, D.C.

Elvis Angyiembe, an associate with Burleson LLP, will speak at International Law Institute's 2013 International Oil and Gas Development course, Washington, D.C.

HOUSTON, TX, June 19, 2013 /EINPresswire.com/ -- [Elvis Angyiembe](#), an associate in [Burleson LLP](#)'s Houston location, will speak at the International Law Institute's 2013 International Oil and Gas Development course in Washington, D.C.

The two-week program will cover upstream, midstream, and downstream contracts as well as key commercial, legal, and financial issues. Angyiembe's presentation, which will be given on June 19, is titled "West Africa: Oil and Gas Legislative Update on Nigeria, Angola, Equatorial Guinea, and Ghana."

"This is an exciting time to do business in West Africa. There are considerable oil and gas resources in the region that, if developed strategically, will play an important role in the vitality of the global energy industry," explained Angyiembe. "The key to unlocking that potential is to understand the specific issues driving the implementation and management of exploration and production initiatives. This presentation will provide insight on that front by giving attendees a legislative update and addressing critical policy trends you need to know for doing oil and gas business in Africa, including issues relating to corporate social responsibility."

As a native of Cameroon, Angyiembe is particularly passionate about oil and gas development in sub-Saharan Africa. He dedicates a significant portion of his time to developing this area of practice, in addition to other areas of international and domestic oil and gas law.

Internationally, he delivers counsel on a wide range of matters involving the Foreign Corrupt Practices Act, U.S. trade embargoes, and export controls. Domestically, he advises clients on title issues related to producing properties in North and South Texas.

In addition to presentations by industry experts, the 2013 International Oil and Gas Development course includes an interactive workshop and hands-on session on the economics, valuation, and dispute resolution of oil and gas contracts. It is primarily aimed at legal advisors, project managers, contract administrators, and other professionals, both from government ministries and agencies as well as from national oil and gas companies, and other practitioners

involved in the negotiation of international oil and gas contracts and implementation of development projects.

About Burleson LLP

With more than 135 attorneys in offices in Houston, San Antonio, Midland, Pittsburgh, and Denver, Burleson LLP is the largest full-service law firm in the country devoted specifically to the oil and gas industry. We are unique in being on the ground in the key markets serving the unconventional shale plays, and we bring a distinct blend of legal understanding and technical skill to our practice. Our attorneys have worked as petroleum engineers, chemists, landmen, and geologists, and more than a third have served as inside legal counsel for oil and gas companies. These qualifications – combined with Burleson's broad geographic reach and comprehensive scope of services – have earned the firm a reputation for providing clients with the most seasoned, energy-specific legal services team the industry has to offer. For further information, visit www.burlesonllp.com.
