

Haypi Monster Version 1.4 Unleashed

Haypi Monster fans have something new to celebrate: the release of Version 1.4!

SHANGHAI, June 19, 2013 /EINPresswire.com/ -- The popular iOS-based MMORPG, Haypi Monster, has delighted millions of players from around the world with its bright graphics, family-friendly gameplay, and multi-lingual availability. Now Haypi Monster fans have something new to celebrate: the release of Version 1.4!

In Haypi Monster Version 1.4, players will encounter two challenging new scenes: Holy Ruins and Barren Land. Each new scene contains 45 levels and the synthesis scroll of a powerful epic monster. The new monster from Holy Ruins, Pattapilla, is a cute little caterpillar with big green eyes. When it evolves into Pattaply, it can unleash powerful Razor Leaves at its enemies. The epic monster of Barren Land, Sneopard, is a blue baby leopard. When it evolves into Clawpard, it can produce deadly attacks with its Ice Beam to strike fear into the hearts of its opponents.

In order to reach these new scenes, the player and monster level caps have been raised by 10 levels. Players can now reach level 40 while their monsters can reach level 60. Players can also upgrade their monster skills to make them more powerful than ever.

In Version 1.4, players can also maneuver through the game a lot easier than they used to. A new feature now lets players lock their monsters, in order to prevent them from being accidentally sacrificed. Players can also view their monsters' genders on their monsters list to simplify the breeding process (previously, players had to tap on the specific monster to see its gender).

The PVP Arena has also seen a major improvement. A new rule was implemented, stating that two players can no longer battle each other more than fifteen times a day. This rule was announced to keep players from using multiple accounts to raise their PVP score.

Players can now get legendary monsters if they complete every Veteran and Expert mode level of the game. Players who pass every Veteran mode level can receive Crystal, an ice-type dragon, while players who complete every Expert level can receive the synthesis scroll of Setanic, a legendary earth-type monster.

Seven new monster skills and four new mystery talents have also been added to the game.
