QCanywhere Exceeds All Expectations With Over 30,000 Deployments

Resounding success for QCanywhere the industry's first cloud-based document, artwork and print inspection solution

MONTREAL, CANADA, June 20, 2013 /EINPresswire.com/ -- Global Vision, the industry leader in securing brand packaging, today announced that a mere two months since the launch of QCanywhere, more than 30,000 deployments worldwide have been activated for these revolutionary new cloud-based quality control apps.

The demand has been overwhelming from industry leaders through to SMBs in a variety of vertical markets including: Pharmaceutical, Legal, Consumer Packed Goods, Government and Education.

As companies expand globally with longer approval cycles and communication barriers, QCanywhere enables businesses to inspect documents regardless of geographic location. Reports can be generated and shared by e-mail to collaborate on quality and dramatically reduce approval cycles and time-to-market.

"QCanywhere is changing the way organizations protect their brands," explained Reuben Malz, President of Global Vision and QCanywhere. "At only $1 per inspection this technology revolution opens up document, print and artwork inspection to any member of an organization, helping them to prevent costly errors."
