IT Governance launches special ISO 27001 Foundation and Lead Implementer training offer to meet unprecedented demand

ELY, UK, June 25, 2013 /EINPresswire.com/ -- IT Governance, the global leader in information security training, has announced unprecedented interest in its ISO27001 foundation and lead implementer courses due to the growing popularity of ISO 27001, the international cyber security standard.

To help companies optimise time and costs, IT Governance has launched a special ISO 27001 Combination Course June offer which includes the highly popular ISO 27001 Foundation and ISO 27001 Lead Implementer courses. If delegates book before the end of June 2013, they will receive a free copy of the final draft of the ISO27001 standard, ISO/IEC FDIS 27001 (expected to be released in in the next few days). They will also receive a free copy of the new ISO27001:2013 standard when it is published (expected September 2013). This means organisations will benefit from implementing ISO 27001 now, whilst ensuring progress to the new version later this year.

Alan Calder, CEO of IT Governance, says, "This is a great added value offer. It is the perfect combination course for delegates who want to save money whilst ensuring they build the knowledge they require to implement ISO 27001"

More and more organisations are using the information security standard ISO 27001 as best practice for improving their cyber security defences and for demonstrating to customers and suppliers that their confidential information is secure.

Developed by implementation experts Alan Calder and Steve Watkins, the IT Governance ISO 27001 Combination Course ensures delegates receive expert guidance for their ISO 27001 project.

Understanding the implementation process and choosing an approach that meets the needs of the organisation can be challenging. Professional training helps implementers gain the knowledge, skills and confidence necessary for completing the project successfully.

Delegates who successfully complete the course will be awarded the Certified ISMS Foundation (CIS F) and Certified ISMS Lead Implementer (CIS LI) qualifications by IBITGQ and will collect 28 CPD/CPE credits.

Places on the course can be booked online at www.itgovernance.co.uk/shop/p-1395.aspx.
