

IT Governance launches new regional website for its North American customers

US, June 25, 2013 /EINPresswire.com/ -- [IT Governance](#) has today launched a new regional website, www.itgovernanceusa.com, to meet the growing demand for cyber security resources in USA, Canada and Mexico. The website offers a unique, single-source provision of information, standards, books, tools, training courses and consultancy services in the field of cyber security, IT governance, risk management and compliance.

Alan Calder, CEO and founder of IT Governance says, "We are very excited about the new website. It has been designed in a way that enables our growing North American customer base to quickly and easily find exactly what they need. The website is a true one-stop-shop for cyber security and IT governance professionals looking for advice, information and resources. Its simple navigation and user-friendly pages make the website an ideal first point of reference when looking for detailed information."

IT Governance provides expert information and guidance on many of today's most critical IT-GRC issues, such as cyber security (including ISO27001, ISO27002 and PCI DSS), IT governance (including COBIT®, ITIL® and ISO20000), business continuity (including ISO22301) and project governance (including PRINCE®2).

www.itgovernanceusa.com offers the very best IT-GRC products available on the market today. These include books, toolkits, staff awareness e-learning courses and software tools. Cyber security professionals will find a range of certified online and classroom training courses which can be booked online.

Drawing on years of experience of working with organizations of varying size and sector, IT Governance offer its North American clients, through the website, an access to the company's bespoke consultancy and technical services designed to help them to meet their project and compliance needs.

For more information visit: www.itgovernanceusa.com.

NOTES TO EDITORS

IT Governance Ltd is the single-source provider of books, tools, training and consultancy for IT governance, risk management and compliance. It is a leading authority on data security and IT governance for business and the public sector. IT Governance is 'non-geek', approaching IT issues from a non-technology background and talking to management in its own language. Its customer base spans Europe, the Americas, the Middle East and Asia. More information is available at www.itgovernance.co.uk.
