

Track Your Truck Adds Turn-Based Reporting to Coyote Series GPS

Vehicle tracking software leader Track Your Truck enhances real-time GPS offerings with turn-based reporting

NEW LENOX, IL, July 2, 2013 /EINPresswire.com/ -- Track Your Truck, a company known for its high-quality [GPS vehicle tracking systems](#) and GPS fleet management software, is now adding turn-based reporting to its Coyote series offerings. The Coyote tracking devices feature real-time tracking that's updated every one or two minutes, an ultra-low power mode, internal GSM and GPS antennae, and starter interrupt harnesses. Now, the devices offer turn-based reporting updates, as well.

"Track Your Truck is excited about adding the turn-based reporting feature, as it provides our customers with even more value by giving deeper insight into a vehicle's route," said Robert Hall, president of Track Your Truck. "We continue to improve the value proposition of NetTrack software with innovative and cost-saving features like this one."

NetTrack is Track Your Truck's automatic vehicle tracking software. This technology allows fleet managers to customize their truck tracking in a way that integrates seamlessly with other needs and goals. Managers pick and choose from a wide range of options, create their own location points and geofences, and add driver names for better tracking of driver performance.

With the addition of turn-based reporting to NetTrack software, fleet managers monitor and observe vehicles in a way that's even more specific and detailed. Through precise reporting, they improve company efficiency and profits.

Beyond real-time GPS vehicle tracking through the Coyote series, Track Your Truck also offers passive cellular GPS tracking and satellite GPS tracking. Its software is in place in service and delivery vehicles, buses, heavy equipment, trailers, and other transportation systems.

About Track Your Truck: Track Your Truck (<http://www.TrackYourTruck.com>) is a privately-held company committed to providing quality GPS vehicle tracking systems and GPS fleet management software that integrate seamlessly with everyday business operations, backed by

reliable service and customer support. With more than 10 years of vehicle tracking service, the Track Your Truck staff has the experience and know-how to provide effective tracking solutions for any industry.
