

# Google-like Image Search Tool to Find Similar Images and Organize Photos is Released by MindGems

LANGLEY, CANADA, July 8, 2013 /EINPresswire.com/ -- Unique tool release by MindGems finds similar images regardless of the file formats and can [organize photos](#) inside an image collection. Visual Similarity Duplicate Image Finder is rated OUTSTANDING by CNet and other reputable photography and technology publishers.

Unique tool release by MindGems finds similar images regardless of the file formats and can organize photos inside an image collection. Visual Similarity Duplicate Image Finder is rated OUTSTANDING by CNet and other reputable photography and technology publishers.

What makes this tool stand out from the myriad of duplicate finders is the fact that besides the easy task of finding exact duplicate files it also manages to find similar photos. Unlike other tools that are advertised as duplicate image finders and are capable of identifying only images stored in a different image format without any modifications applied, VSDIF detects also photos that are re-sized, color-corrected, watermarked, edited or converted to various image file formats. The tool can identify the same person or object that is captured on multiple photos.

The main benefits of using Visual Similarity Duplicate Image Finder are:

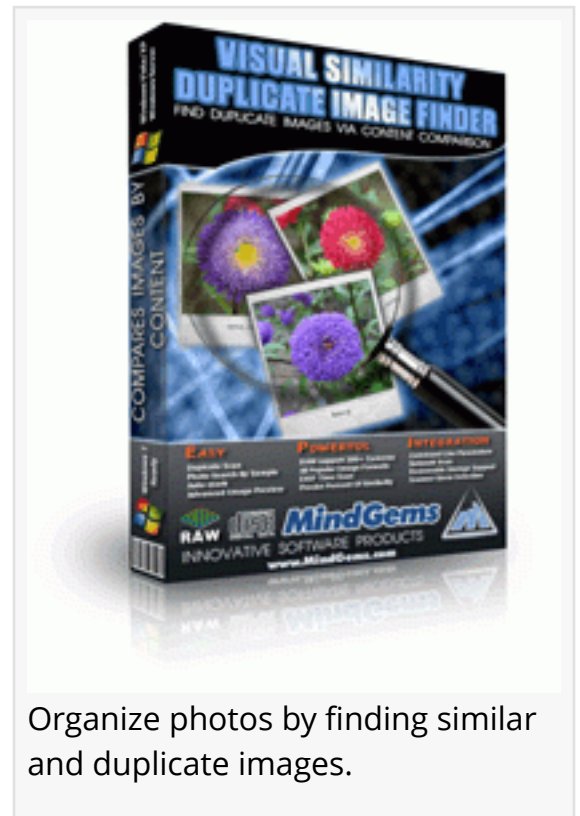

Save valuable disk space by removing similar or duplicate photos

Improve system performance by reducing the number of redundant files

Organize photo collections

[Image Search](#) feature - search for similar images inside a large image collection using a sample image.

Visual Similarity Duplicate Image Finder is a professional tool that has a Corporate version integrated and used in stock photography web sites, medical image analysis software, document

Organize photos by finding similar and duplicate images.

management systems and other industries that require professional image analysis. Luckily MindGems provides a low-cost desktop version of this advanced tool that is popular among professional photographers and photography enthusiasts. Another tool provided by MindGems can find duplicate and similar songs. Audio Dedupe works in a similar to VSDIF way, but for music files.

Company background:

Founded in 2001, MindGems Inc. provides market-leading shareware and freeware products for home and business use.
