

# Portland Good Feet Offers Plantar Fasciitis Foot Pain Relief With Good Feet Orthotics

*Leading International Retailer of Custom-Fitted Arch Supports Brings New Approach to Foot Pain Relief to Portland Local Community.*

PORTLAND, OR, July 9, 2013 /EINPresswire.com/ -- Good Feet Worldwide, LLC., an international retailer of custom-fitted arch support, announced its foot pain relief process focusing on reducing plantar fasciitis foot pain and heel pain for Portland.

An estimated 87 percent of the general population suffers from foot-related problems, most of which can be linked to improper support for flat feet or high arches, wearing improper footwear, walking or standing on hard surfaces for long periods of time, being overweight or suffering from sports injuries. While many people looking for relief turn to the various arch supports and cushion products they see in retailers like drug and grocery stores, Good Feet takes the process to another level.

The Portland Good Feet's new plantar fasciitis foot pain relief process provides each customer with personal bio-mechanical balancing and measuring. The customer's primary activities and shoe style preferences are also taken into consideration prior to being personally fitted with arch supports that can provide them with the ultimate comfort, balance and support.

"There are so many people in our community suffering from foot, back, and knee pain. This is our way to help them become pain free," said Dan Austad, owner of the Good Feet Stores in Oregon.

Good Feet Portland offers a non-medical solution to relieving foot pain, heel pain and plantar fasciitis through arch supports, insoles and cushions. As an alternative to painful medical visits, customers have found immediate relief from foot pain, heel pain, back pain and plantar fasciitis in Portland through the use of the Good Feet arch supports.

Good Feet Portland heel pain relief products are designed to support all four of the foot's arches, which makes the personal fitting process so important. Through better arch support, a person's body weight can be more evenly distributed, which maximizes stability and balance. The Good Feet Portland foot pain relief products are also designed to reduce pressure and eliminate foot pain, knee pain and even back pain.
