Certificated ISO 22301 learning pathway meets professional development needs

ELY, UK, July 10, 2013 /EINPresswire.com/ -- IT Governance Ltd, the single source provider of ISO 22301-compliance solutions, has launched a certificated ISO 22301 learning pathway to meet the rising demand for ISO 22301 implementation skills amongst business continuity professionals.

Following the 2012 launch of ISO 22301, the international standard for business continuity management, the need for professionals skilled in the implementation of this standard has grown significantly. To meet this demand, IT Governance Ltd is delivering the ISO 22301 Certified BCMS Foundation and ISO 22301 BCMS Lead Implementation courses to provide a skills development pathway for professionals.

The ISO 22301 learning pathway encompasses all stages of implementing an ISO 22301 compliant business continuity management system (BCMS). As well as developing implementation skills, the pathway includes opportunities to gain the Certified BCMS Foundation (CBC F) and Certified BCMS Lead Implementer (CBC LI) qualifications. These industry-standard qualifications are awarded by IBITGQ and demonstrate proficiency in delivering ISO22301 compliance.

Tony Drewitt, Risk Consultant at IT Governance and Business Continuity Expert comments: "ISO22301 training equips professionals with the knowledge and skills to take the most cost-effective and efficient route to compliance and certification.

An industry-standard ISO 22301 qualification is a great addition to any C.V. particularly as the demand for certified organisations will increase in the future, as customers seek assurance that appropriate measures are in place for business continuity."

The next ISO 22301 Foundation and Lead Implementer courses will take place in London from 12-15 August 2013 and places are currently still available. Further details can be found at: www.itgovernance.co.uk/shop/c-278.aspx.
