

Working Luncheon Series Kicks off July 16 with Clean Fracking Panel at The Petroleum Club

The Petroleum Connection Kicks off the Working Luncheon Series on July 16 with a panel discussion Clean Fracturing at the Petroleum Club in Houston.

HOUSTON, TX, July 10, 2013 /EINPresswire.com/ -- The [Petroleum Connection](http://petroleumconnection.com) has announced the [Working Luncheon Series](http://petroleumconnection.com/LuncheonSeries/), an engaging and thought-provoking luncheon series. The initial luncheon, being held at The Petroleum Club in Houston, will be on the important, controversial, and often-misunderstood issue of Clean Fracking!

Over lunch at the historic Petroleum Club of Houston, a panel of industry leaders and current innovators will discuss emerging technologies and practices in hydraulic fracturing and the issue of public communication. With time for Q&A from the audience and networking after the luncheon, the dynamic format will be business and networking friendly and will also interest the non-industry professional.

Panelists include Omar Garcia, President & CEO of STEER, B.E. "Bob" Hall from Environmental and Energy Services, and Brad Holms, Chief Technology Officer at FTS International.

Current luncheon sponsors include Rainbow Ceramics and STEER.

Visit the Petroleum Connection Working Luncheon Series website for more information and to register:

About the Petroleum Connection

Petroleum Connection offers high-level conferences on targeted issues in the dynamic and important oil and gas industry. Few industries are generating as much present and future growth and opportunity as the oil and gas industry; and few industries also carry such important political implications and human issues—from the health of local communities and the

environment to national security, energy independence, and world dynamics.

Petroleum Connection conferences are intentionally limited in size and focus on niche, but important, issues that have many “spokes”—connected parts, interests, and implications. Located at top resorts, we provide excellent hospitality and an atmosphere conducive to frank discussions, easy networking with industry leaders, broad context, and personal engagement.

In our way and in our content, we look to inject a key factor into the mix of things that adds necessary perspective—the human factor.

Upcoming Conferences include:

The [2nd Annual Frac Sand Supply](#) & Logistics Conference being held in San Antonio September 5 & 6 - www.sandconference.com

The 2013 Clean Fracking Communication & Technology Conference being held in Beaver Creek, CO on October 8 & 9 - <http://www.petroleumconnection.com/cleanfracking/>
