

Clinton Township Dentist Announces New 'Face-Lift' Dentures

CLINTON TOWNSHIP, WI, July 10, 2013 /

EINPresswire.com/ -- The Baypointe Dental clinic in Clinton Township, MI, has recently begun fitting patients with a new type of dentures called "face-lift" dentures. These dentures are unique because not only do they replace a person's full set of teeth, but they also improve the person's look.

The Baypointe Dental clinic in Clinton Township, MI, has recently begun fitting patients with a new type of dentures called "face-lift" dentures. These dentures are unique because not only do they replace a person's full set of teeth, but they also improve the person's look dramatically. This noticeable change is brought about by the way these dentures fit in the mouth.

While traditional dentures provide a person with the continued ability to chew food, the new face-lift dentures give the persons facial structure extra support, giving the appearance of a fuller jaw, and pushing out in the front of the mouth to reduce a sagging mouth. Along with the improved appearance, most patients report that these dentures are the most comfortable they have ever worn.

"Having to get dentures can be a very difficult transition for a patient because of the negative stigma associated with having them. The face-lift dentures not only look far more natural, but, in most cases, also fit better, resulting in greater comfort for the wearer. It is very rewarding to be able to offer this alternative to our patients and clients," said Dr. Kachorek, a [Clinton Township Dentist](#).

Baypointe Dental is a full-service Clinton Township Dentist offering everything from basic cleanings and cavity treatments to oral surgery and orthodontics. Dr. Kachorek is in his 30th year practicing dentistry and is a member of the [American Dental Association](#), the Michigan Dental Association, and the American Academy of Cosmetic Dentistry.
