

IT Governance launches the Complete ISO22301 BCMS Toolkit Suite

ELY, UK, July 11, 2013 /EINPresswire.com/ -- [IT Governance](#), the global leader in business continuity management (BCM) and [ISO 22301](#) compliance expertise, has launched The [Complete ISO 22301 Toolkit Suite](#) to provide business continuity professionals with all the tools to implement a Business Continuity Management System (BCMS).

The Complete ISO 22301 Toolkit Suite is the ultimate all-in-one resource for every implementer as it provides the tools for the core implementation stages of the ISO 22301 BCMS project that involve investigating, planning and doing. It includes a copy of the ISO 22301 standard, an implementation guide as well as pre-written document templates that can easily be tailored to meet the organisation's own requirements.

Implementing a Business Continuity Management System (BCMS) aligned to ISO 22301 (the international business continuity standard) enables organisations to identify threats relevant to them and make plans to address disruptive incidents.

Alan Calder, CEO of IT Governance, says: "Most organisations have a business continuity plan, but few have made this plan part of a business continuity management system to ensure it is regularly updated and integrated in the overall management process.

"Thanks to ISO 22301 there is now international guidance on developing a business continuity management system that ensures the business continuity plan is actually effective. The Complete ISO 22301 Toolkit Suite has been designed to facilitate and guide organisations through the process. For organisations looking to achieve ISO 22301 certification this resource is invaluable."

The Complete ISO 22301 Toolkit Suite can be ordered online at www.itgovernance.co.uk/shop/p-1334.aspx.

NOTES TO EDITORS

IT Governance Ltd is the single-source provider of books, tools, training and consultancy for IT governance, risk management and compliance. It is a leading authority on data security and IT governance for business and the public sector. IT Governance is 'non-geek', approaching IT issues from a non-technology background and talking to management in its own language. Its customer base spans Europe, the Americas, the Middle East and Asia. More information is available at www.itgovernance.co.uk.
