

Exploring novel ways to fight diabetes - OMICS Group Medical Conferences

4th World Congress on Diabetes and Metabolism at Chicago North Shore, USA from August 14-16, 2013.

HENDERSON, NV, July 15, 2013

/EINPresswire.com/ -- Are you upset with frequent hunger, thirst & urination? You might have to consult your doctor immediately for any unusual rise in blood sugar levels. Are you still not clear on how to maintain a sustainable health? Then, just read this:

Diabetes is purely a metabolic malfunction due to which a person has high blood sugar levels either because the pancreas does not produce sufficient insulin or because of the cells not responding to the insulin that is produced.

As the popular adage says, prevention is always better than cure. There are hundreds of healthy ways on how to keep this at bay. If already diagnosed diabetic, no worries, as there are thousands of ways on how to master control over the demon.

Have a look at the facts presented on the way it is spreading.

- 366 million people have diabetes in 2011; by 2030 this will have risen to 552 million
- The number of people with type 2 diabetes is increasing in every country
- 80% of people with diabetes live in low- and middle-income countries
- The greatest number of people with diabetes are between 40 to 59 years of age
- 183 million people (50%) with diabetes are undiagnosed
- Diabetes caused 4.6 million deaths in 2011

Workshop on Achieving & Maintaining Perfect Diabetes Control: New Ways and Means

Symposium - Systemic effects of Diabetes and Obesity in Transplantation Diabetes 2013

Young Scientist Award

- Diabetes caused at least USD 465 billion dollars in healthcare expenditures in 2011; 11% of total healthcare expenditures in adults (20-79 years)
- 78,000 children develop type 1 diabetes every year

(Source: International Diabetes Federation)
Realizing the gravity of the diabetics that is constantly on rise due to urbanization and tremendous changes in human lifestyles, [OMICS Group](#) Medical Conference has announced the 4th World Congress on Diabetes and Metabolism at Chicago North Shore, USA from August 14-16, 2013 under the theme 'To translate and harness novel therapies in diabetes'.

This conference provides both the speakers and delegates a wonderful opportunity to exchange in-depth knowledge and latest insights about the prevention and cure of diabetes.

The event also hosts a Workshop titled 'Achieving and Maintaining Perfect Diabetes Control: New Ways and Means' in coping with diabetic complications and a one-day Symposium that sheds light on the systemic effects of diabetes and obesity on transplantation.

Esteemed speakers of the Diabetes 2013 conference include

Louise Larose, Associate Professor of Medicine, McGill University, USA

Patrick Nelson, University of Michigan, USA

George Bakris, University of Chicago, USA

Lubov Kolesnikova, Director, Scientific Centre of Family Health and Human Reproduction Problems, Russian Academy of Medical Sciences, Russia

Mehmet Akif Buyukbese, KSU School of Medicine, Turkey

Major tracks of [Diabetes Congress](#) 2013 include

1. Clinical Diabetes and Diagnostic Approaches
2. Diabetes Management
3. Diabetes and its Complications
4. Endocrinology: Patient-Oriented Case Management Discussions
5. Advanced Technologies for Treatment of Diabetes

6. Advancement of New Drug/Biomarker Discovery for Treatment of Diabetes
7. Genetics of Diabetes
8. Emerging Focus in Diabetes Research
