

# Night Flight Concepts Offers Operational Risk Management Training to Clients

BEDFORD, TEXAS, July 16, 2013 /EINPresswire.com/ -- Night Flight Concepts and The Squadron have formed a strategic alliance to provide [Operational Risk Management](#) (ORM) training for organizations conducting [Night Vision Goggle](#) (NVG) operations.

Night Flight Concepts and The Squadron have formed a strategic alliance to provide Operational Risk Management (ORM) training for organizations conducting Night Vision Goggle (NVG) operations.

The [ORM training](#) program consists of academics and practical exercises geared for operators to easily apply risk management principles into daily routine. The program is always tailored to operator-specific mission tasks and not just a generic approach found in most other risk management training programs.

The 1- or 2-day course facilitates individual and crew understanding of how to look at what they do every day and quantify it in a way that is useful during all phases of the flight, from preflight to debrief.

EMS Operator conducts infinity exercise to identify various hazards associated with NVG flight operations during day 2 of the ORM Training Course with The Squadron and Night Flight Concepts.

“

A critical part of establishing safe and effective NVG operations is the integration of appropriate risk management strategies and tools.”

*Adam Aldous*

Pilots, TFOs, flight medics, other crewmembers, mechanics, and administrators learn together what their individual and entire organization’s appetite for risk actually is; they learn how to manage it, and how to actually manage change.

The big takeaway from the new ORM Training Course is operators make their own Flight Risk Assessment Tool

(FRAT) and in turn learn the true value of briefing and debriefing their activities, so they buy in to using ORM from the start.

“A critical part of establishing safe and effective NVG operations is the integration of appropriate

risk management strategies and tools,” stated Adam Aldous, President and CEO of Night Flight Concepts. “The real-world operational experience combined with the vast knowledge in Aviation Safety procedures makes The Squadron the right choice to deliver ORM training as part of the Comprehensive NVG Solutions our clients have come to expect.”

“This is a important alliance for the aviation industry,” stated Dan Deutermann, Managing Director of The Squadron, “the ORM training course delivers an operational layer of flight safety to new or existing operators delving into the nighttime environment to deliver their services. It goes to show that Night Flight Concepts is truly a step ahead in helping their customers integrate NVG operations in a safe and effective manner. NVGs open up a new level of capability, particularly for rotary wing operators working in remote areas; however, with this gain comes exposure to new hazards and new levels of risk – and we’re here to help operators learn to manage this risk in a practical way.”

To learn more about the Operational Risk Management (ORM) Training Course, stop by booth 427-429 at the ALEA Exposition in Orlando, Florida, July 17-19, 2013, or contact Night Flight Concepts at [info@nightflightconcepts.com](mailto:info@nightflightconcepts.com) or (888) 632-8764.

About The Squadron ([www.the-squadron.com](http://www.the-squadron.com))

The Squadron is an aviation risk management group designed by operators for operators. We provide consultation, auditing, and training services to any form of aviation discipline by utilizing our practical and “white hat” approach to help operators move past the theoretical stage or strategic level thinking and actually apply risk management practices into the daily flight activities and maintenance efforts.

About Night Flight Concepts ([www.nightflightconcepts.com](http://www.nightflightconcepts.com))

Night Flight Concepts (NFC) is a comprehensive night vision technology (NVT) provider specializing in night vision goggle (NVG) program planning and support, NVG maintenance technician training, NVG service and maintenance repair, NVG pilot and crewmember flight training, and night vision program support for law enforcement agencies, air medical/rescue services, military organizations, and government task force agencies worldwide.
