

# Sciedu Press Comments on the Important Contributions of Academic Journals

*According to the Sciedu Press editors, academic journals contribute to the distribution of front-line research results and provide expert insight to readers.*

TORONTO, ON, July 16, 2013 /EINPresswire.com/ -- Academic journals are a body of work that publishes academic articles which have been peer reviewed. A journal's main function is to distribute knowledge, not maximizes publishers' income. Academic journals contain a wealth of research results from various different areas. Students often quote academic journal facts or opinions to support their own work. These journals provide the students with fact-checked resources that they can use to further their research on a particular subject. Consider the following benefits of academic journals:

Facts or opinions are referenced

One of the advantages of academic journals is the information has been thoroughly documented. The academic documentation provides readers with the exact source of the information. These articles will also offer a detailed bibliography at the end for the readers to reference. The studies and experiments that are quoted in the articles have also been examined for common scientific mistakes.

The [Sciedu press editor](#) ( blog ) says, "If a reader thoroughly enjoys an article, they can use the article's list of recommendations for further reading to help them find more interesting topics. Readers should also understand that these articles are long and complex in order to accurately convey certain information".

Articles are selected and reviewed by reviewers

In order for an academic journal to be approved for publishing, it must undergo exact reviews by a panel of experts. This panel can consist of two or more experts that will carefully determine if

Sciedu Press specialize in publishing research journals covering a broad range of fields including sciences, medicine, social sciences, engineering, business, and management.

the submission should be published. The review board will reject any piece of work if they don't feel that it is ready for publication. Once the review is complete, they will make a choice that accept or reject the submission. Some articles are accepted with revisions that require the writer to improve their work. "Authors can rest assure that these journals have been thoroughly fact-checked, spell-checked, and reworked before they were published"(Sciedu Press Blog) Many submissions are sent back to authors, as they simply do not meet the academic article criteria.

### Authors are experts

Compared with other journal or magazines, Academic journals' authors are professors, graduate students, or professionals who have had a fair amount of firsthand experience on writing academic journals. While the subject matter may seem complicated, they use their vocabulary and their industry knowledge to effectively communicate with various audiences. Their expertise makes academic journals a great resource for students and other professionals alike.

Sciedu Press is a scientific publishing house. Its objective is to distribute excellent knowledge in social science, education, engineering and economics by publishing a variety of research from around the world.
