

Dallas Fort Worth Good Feet Offers Free Consultation And Foot Analysis

Leading Retailer of Custom-Fitted Arch Supports Brings Foot Health Education to Local Community.

DALLAS FORT WORTH, TX, USA, July 23, 2013 /EINPresswire.com/ -- Good Feet, a local retailer of custom-fitted arch support, announced today their free foot consultations and foot analysis to local community in Dallas, TX.

An estimated 87 percent of the general population suffer from foot-related problems, most of which can be linked to improper support for flat feet or high arches, wearing improper footwear, walking or standing on hard surfaces for long periods of time, being overweight, or suffering from sports injuries. While many people who are looking for relief turn to retailers like drug and grocery stores, Good Feet takes the process to another level.

Good Feet sales consultants take each customer through a personal bio-mechanical balancing and measurement process to identify the customer's primary activities and shoe style preferences. Next, the customer is personally fit with arch supports and cushions that can provide them with the comfort, balance and support.

"Good Feet in Dallas Fort Worth strive to educate the community on alternatives to finding relief from foot, knee, hip, and back pain. An alternative to costly and dangerous medication, shots and surgery would be our Good Feet arch supports," said Jim Waterman, owner of the Good Feet stores in Dallas Fort Worth.

Good Feet products are designed to support all four of the foot's arches, which makes the personal fitting process so important. Through better foot support, a person's body weight is more evenly distributed which maximizes stability and balance, and can reduce pressure that can cause discomfort, not just in the feet, but upwards through the legs, hips and back.

"We would like our customers to become more balanced and comfortable, so they can get back to doing what they love to do and what they need to do," added Waterman. "We want people know that Good Feet is here in their community and we provide free consultations to any and all community members."
