

UAE operations of Globe Express Services report 38 per cent revenue surge in H1 2013

Jebel Ali expansion, new Abu Dhabi office spur growth

DUBAI, UAE, July 24, 2013 /EINPresswire.com/ -- July 24, 2013

Globe Express Services, one of the world's top 100 global logistics providers, has announced that the revenue of its UAE offices for H1 2013 rose 38 per cent over the same period last year. The impressive growth was attributed to key developments such as the expansion of Jebel Ali operations and the opening of a new office in Abu Dhabi.

In 2012, Globe Express Services made vast improvements to its geographic network and logistics resources. The group opened a state-of-the-art industrial warehouse in Dubai's Jebel Ali Free Zone, inaugurated its Abu Dhabi office, expanded its office network to 58 corporate locations worldwide, and forged partnerships with key entities such as ITSA, a leading international air and ocean freight forwarder based in Italy.

For this year, Globe Express Services is focusing on reinforcing its core offerings, expanding ties with existing customers and key vendor partners, developing new business and industry verticals, and enhancing its technology platform.

"So far we are within the parameters of our annual growth goals and right on track to deliver another exceptionally strong performance based on our solid results for the first half of 2013. Our full commitment to quality, excellence and customer satisfaction will, as usual, be the driving force for our continued growth this year. We will always continue to deliver quick results and streamline our processes even further to maintain our industry edge," said Mustapha Kawam, Managing Director-Gulf States of GES.

Globe Express Services is a full-service, global logistics services provider. Out-of-gauge services are a core offering of the company's Project Logistics and Management portfolio. Through its Logistics and Compliance Consulting division, the company offers expertise in creative warehouse design, distribution, supply chain execution and material handling solutions for leading retail, wholesale, and consumer product manufacturing companies. GES's consultancy service also covers selection and implementation of supply chain execution software, including comprehensive systems for warehouse management, asset management, transportation management, yard management and labor management.
