

# Rhin-O-Tuff Demonstrates Binder Equipment At Istanbul Trade Show, Printtek 2013

*Rhin-O-Tuff presented demonstrations of spiral binder and wire binding machine equipment at booths for two Turkish dealers, Teknoset and Bukom, at Printtek 2013*

ISTANBUL, TURKEY, July 24, 2013 /EINPresswire.com/ -- ISTANBUL, TURKEY – Over 28,000 visitors attended the extensive meeting of print technologies at this year's Printtek Fair. This six day show spread over five halls, and included industry representatives from 38 countries. These companies gathered to demonstrate the full range of print technology services, from pre-press through post-press, including binder equipment. Representatives from [Rhin-O-Tuff](#) were proud to be a part of this premiere meeting point for the Print and Paper Industries in Turkey and the Eurasian regions.

The brand was well received at this busy trade show.

“

This was a great opportunity for us to demonstrate a range of equipment, including our spiral binder equipment, and the durability and quality of manufacturing for which we're known.”

*John Lugviel*

"This was a great opportunity for us to demonstrate a range of equipment, including our spiral binder equipment, and the durability and quality of manufacturing for which we're known. Most importantly, we felt this was a way for us to show solidarity with our two Turkish Rhin-O-Tuff dealers: Bukom, based in Ankara and Teknoset, based in Istanbul. Both dealers had booths and appreciated our support during their largest and busiest print show," said John Lugviel, Vice President of Business Development for Rhin-O-Tuff.

Rhin-O-Tuff began as an extension of a lifelong dedication to quality, durable, high performance products. From racecars and motorcycles, Marvin

Whiteman, former owner of Whiteman Industries, and his team of designers moved on to engineering and building better, more efficient paper punches. It was a short journey between their first table top punch with interchangeable dials, the Versa Punch, and the full range of paper punching and [document binding systems](#) that Rhin-O-Tuff offers today.

The goal when creating the finishing equipment that Rhin-O-Tuff manufactures was to allow for the flexibility customers wanted in order to be able to configure modules to suit their unique document binding and punching needs. "Essentially, Rhin-O-Tuff's binding systems are designed to be easily adaptable, changing quickly from one project requirement to the next," explains Lugviel.

The company now offers a range of binding and finishing equipment, designed to handle the needs of any print production facility. The ONYX series is designed to accommodate any size paper punching and document binding job with the same, consistent, quality across the product line. From the ONYX 4000PLUS, designed with a paper punching capacity of 20 sheets of 20-pound paper to the ONYX HD7700 wire binding machine, boasting the capability to punch up to 55 sheets of 20-pound bond paper, Rhin-O-Tuff strives to demonstrate a focus on durability and reliability, backed by their 3-year warranty.
