

Florida Heart Group Releases New Website Design

Leading Florida cardiology practice Florida Heart Group recently released a new website design.

ORLANDO, FLORIDA, USA, July 25, 2013

/EINPresswire.com/ -- "People from all over the globe come to our [Florida heart hospital](#) for cardiology services, making us one of the leading practices in Florida. Because so many people now find us through the web, it only makes sense that we create a presence which reflects our status in the non-digital world. In addition, we feel the design highlights our comprehensive service offering, while making it simple for patients to navigate and perform critical functions, like scheduling an appointment," said CEO Andrew Laverghetta.

The revamped website also helps showcase Florida Heart Group's ability to provide expert care for a multitude of heart conditions. The services their skilled team of [cardiology physicians](#) offers include:

- 1.-Heart failure treatment – The Congestive Heart Failure Clinic provides economical outpatient treatment for congestive heart failure, which is when the heart is unable to pump enough oxygen-rich blood to the body.
- 2.-Arrhythmia treatment – Florida Heart Group features among the best "electricians of the heart" who help treat arrhythmia (an irregular heartbeat).
- 3.-Adult congenital heart disease – 90% of children with congenital heart disease reach adulthood, and this service provides a smooth transition from pediatric to adult-centered care.
- 4.-Interventional cardiology – This service deals exclusively with treating several types of heart disease requiring the insertion of a catheter.
- 5.-Outpatient congestive heart failure management – This service makes it possible for patients to economically manage problems and symptoms related to congestive heart failure.
- 6.-Treatment especially for women's heart disease – Several female cardiologists treat the special cardiological needs of women and help raise awareness of the condition.
- 7.-Peripheral vascular disease treatment – 5% of adults over 50 suffer from dysfunction related

Our leading heart group in Central Florida, our clinics specialize in heart failure, arrhythmia, adult congenital heart disease, women's heart disease, interventional cardiology, vein conditions, peripheral vascular disease, and diagnostic imaging.

to this system, and this service helps patients identify custom treatment options to keep their vascular system healthy.

8.-Diagnostic imaging – Florida Heart Group prides itself on a conservative approach to diagnostic testing, which helps saves patients from unnecessary exposure to radiation and reduces out-of-pocket medical costs. This means Florida Heart Group tests less, while at the same time providing patient outcomes that equal or outperform other practices.

Patients concerned with the health of their heart should visit the [Florida cardiology](#) practice's website at <http://www.fhg.org> to learn more or to schedule a preventative screening.

About Florida Heart Group: Founded in 1979, Florida Heart Group has grown into a globally recognized leader in the diagnosis, treatment, and prevention of heart disease. With 19 skilled specialists focusing on specializations such as Interventional Cardiology, Women's Heart Disease, Arrhythmia, and Adult Congenital Heart Disease, the organization helps patients at all stages of the heart disease treatment process. Helpful information can be found on the organization's blog, as well as its Facebook and Twitter accounts.
