

# Equipment & Maintenance Manager Improves Safety and Saves Money for First Responders.

---

*June 27, 2013/Redmond, Washington Dynamic Systems launched a low cost Equipment and Maintenance manager for Fire, HAZMAT, 911 organizations, Search and Rescue*

REDMOND, WASHINGTON, UNITED STATES, June 27, 2013 /EINPresswire.com/ -- About Dynamic Systems (DSI)

In business since 1981, DSI provides bar code systems that track equipment, inventory, documents, capital assets and maintenance or service schedules. Bar code data collection has been proven to be the most accurate and efficient method of tracking or counting items.

## Release of Equipment Manager Software

DSI has announced the launch of Equipment Manager, targeted for agencies that need to track service due on equipment and save time tracking down tools and gear. The software tells you who has it, where it is, when it is due back.

The program reports when an inspection, repair, or cleaning is due on items such as parts, laptops, hoses, pagers, radios, pagers, and terminals. It is easy to check equipment in and out to each apparatus and between stations. You can also track inspections of buildings, extinguishers, hydro testing, hose inventory, repairs, SCUBA gear, maintenance of the station, training records, and maintenance on vehicles and equipment (NFPA 1851). The inventory module tracks consumable supplies as well. "Checkmate will improve performance and is an affordable program for even those with a few employees," stated Bill Allen, Process Control Consultant.

## Cost Justification

It requires less than a minute to check an item in and out, and cuts hours off equipment checks and inspections. Loss of time and malfunctioning gear can be a major overhead cost for departments. Our customers see a typical payback with the Equipment Manager within 3-4 months," states Alison Falco, President of Dynamic Systems.
